Martin Luther King Jr both local clergymen emerged from modest backgrounds to lead world changing movements Finally McChrystal explores how his former hero General Robert E Lee could seemingly do everything right in his military career and yet lead the Confederate Army to a devastating defeat in the service of an immoral cause Leaders will help you take stock of your own leadership whether you re part of a small team or responsible for an entire nation **How**

Indian Ocean World, 2014-08-07 Zheng He's Maritime Voyages 1405-1433 and China's Relations with the Indian Ocean World A Multilingual Bibliography provides a multidisciplinary guide to publications on this great navigator's activities and their impact on Chinese and world history. Admiral Zheng He commanded the fifteenth century world's largest fleet. In the course of seven voyages made between 1405 and 1433, his massive ships visited over thirty present-day countries in Asia and Africa. Those voyages reflected and reinforced the development of complex networks of trade, migration, cultural exchange, and political interactions between China and the Indian Ocean world. This bibliography lists sources in thirteen languages, including both scholarly studies and popular works like Gavin Menzies's controversial bestsellers claiming the Chinese sailed around the world before Columbus. Relevant translations, transliterations, and annotations are provided to aid the reader.

Führung Stanley McChrystal, Jeff Eggers, Jason Mangone, 2011-11-11 Als ehemaliger General und Kommandeur der Afghanistantruppen kennt sich Stanley McChrystal bestens mit Führung aus. Er zeigt, dass Führung nicht das ist, was man gemeinhin denkt, da es das auch nie war. Führung ist dann herausragend, wenn sie einen unkonventionellen Weg einschlägt. 13 bekannte Führungspersönlichkeiten aus verschiedenen Bereichen und Epochen belegen dies in seinem Buch. Walt Disney und Coco Chanel erschufen beide auf ihre Weise Unternehmensimperien. Margaret Thatcher gelangte an die Spitze von Großbritannien, und die Geistlichen Martin Luther und sein Namensvetter Martin Luther King Jr. führten beide zu ihrer Zeit weltverändernde Bewegungen an. Anhand der einzigartigen Erfolgsgeschichten räumt der Autor mit gängigen Mythen auf und zeigt, was gute Führung in der Praxis tatsächlich ausmacht.

China's Western Horizon Daniel S. Markey, 2020 Under the ambitious leadership of President Xi Jinping, China is zealously transforming its wealth and economic power into potent tools of global political influence. But China's foreign policy initiatives, even the vaunted Belt and Road, will be shaped and redefined as they confront the ground realities of local and regional politics outside China. In *China's Western Horizon*, Daniel S. Markey, a scholar of international relations and former member of the U.S. State Department's policy planning staff, previews how China's efforts are likely to play out along its western horizon across the swath of Eurasia that includes South Asia, Central Asia, and the Middle East. Drawing from extensive interviews, travels, and historical research, Markey describes how perceptions of China vary widely within states such as Pakistan, Kazakhstan, and Iran. Powerful and privileged groups across the region often expect to profit from their connections to China, while others fear commercial and political losses. Similarly, Eurasian statesmen are scrambling to harness China's energy, purchases, arms sales, and infrastructure investment. These leaders are working with China in order to outdo their strategic competitors, including India and Saudi Arabia, and simultaneously negotiating relations with Russia and America. On balance, Markey anticipates that China's deepening involvement will play to the advantage of regional strongmen and exacerbate the political tensions within and among Eurasian states. To make the most of America's limited influence in China's backyard and elsewhere, he argues that U.S. policymakers should pursue a selective and localized strategy to serve America's specific aims in Eurasia and to better

compete with China over the long run **China: The Stealth Empire** Edward Burman, 2008-06-08 China The Stealth Empire asks why it is that China despite its size and once advanced culture and technology did not become a world power centuries ago Burman traces the answer through Chinese innate sense of superiority which made foreign conquest and trade an irrelevance This is about to change with the evolution of what is termed the Stealth Empire characterised by world dominance in the production of consumer goods a growing share of world manufacturing and a strong sense of nationalism The Chinese believe that they need to do nothing as they evolve by the middle of the century into the dominant world power Burman's book opens a window onto this history and growing sense of national destiny It will be essential reading for anyone wanting to understand what is going on in the Stealth Empire From the Mediterranean to the China Sea C. Guillot, Denys Lombard, Roderich Ptak, 1998 With the assistance of Richard Teschke The East and West in Late Medieval Travel Writings Na Chang, 2024-10-07 This book traces the history of encounter between Eastern and Western cultures by closely examining a body of medieval travel writings penned or related by Europeans and by inhabitants of East Asia Whilst these texts are usually considered in the context of kindred European or Chinese literature this study will make a case for considering them as a common literature of medieval encounters with foreign people For the modern historian writing in a world that so consciously thinks of itself as global these accounts offer a precious lens through which to enter into the world before globalization In particular the book shows that these narratives show the similarity in how Eastern and Western travellers thought and behaved in the face of difference and will show that individuals often held somewhat different views shaped by their particular experience or agendas than those of their government or of local cultural convention Beyond Eurocentrism - Rethinking the Commercial, Scientific, and Industrial Revolutions , *Great Powers and Geopolitical Change* Jakub J. Grygiel, 2007-02-01 Named by Foreign Affairs as a book to read on geopolitics In an era of high technology and instant communication the role of geography in the formation of strategy and politics in international relations can be undervalued But the mountains of Afghanistan and the scorching sand storms of Iraq have provided stark reminders that geographical realities continue to have a profound impact on the success of military campaigns Here political scientist Jakub J Grygiel brings to light the importance of incorporating geography into grand strategy He argues that states can increase and maintain their position of power by pursuing a geostrategy that focuses on control of resources and lines of communication Grygiel examines case studies of Venice the Ottoman Empire and China in the global fifteenth century all great powers that faced a dramatic change in geopolitics when new routes and continents were discovered The location of resources the layout of trade networks and the stability of state boundaries played a large role in the success or failure of these three powers Grygiel asserts that though many other aspects of foreign policy have changed throughout history strategic response to geographical features remains one of the most salient factors in establishing and maintaining power in the international arena **Eden and the Fall - the Fallacies of Radical Ecological History** , 1999 Radical ecology claims

to be a new movement at the cutting edge of social change offering a solution to current social and ecological problems through the rejection of reformist ecological politics in favour of a radical restructuring of industrial and especially Western society. The claim to have discovered the historical cause of current ecological and social problems plays a key role in validating this radical approach. Although numerous interpretations of the historical origins of existing social and ecological problems exist within radical ecology, three main variants have been identified. This thesis critically examines the three main variants of radical ecological history: the belief in primal harmony, the belief in the civilisation of the goddess and its destruction by a Kurgan invasion, and the view that the rise of capitalism and the mechanistic world view was responsible for the ecological and social crises of today. In so doing, it also examines a number of key questions central to radical ecological history: when did violence and hierarchy begin in human history, is it possible to argue that today's ecological crisis has a religious cause, and can the scientific, technological, and commercial revolutions be truly described as purely Western phenomena. The main findings of this thesis are that each of these variants of radical ecological history is chronically flawed. In addition to numerous empirical errors, each of these historical interpretations is based on an extremely simplistic Eurocentric reading of the past based on the use of archetypal stereotypes of good and evil that have little or no historical foundation. While these interpretations of history vary profoundly, they are all based on the same underlying model of history whose origins lie in the Judeo-Christian apocalyptic tradition and ultimately in Zoroastrianism. While some of the flaws of radical ecological history are a result of poor scholarship, it is argued that it is the use of t

The Black Holocaust For Beginners S.E. Anderson, 2007-08-21. Virtually anyone anywhere knows that six million Jewish human beings were killed in the Jewish Holocaust. But how many African human beings were killed in the Black Holocaust from the start of the European slave trade c. 1500 to the Civil War 1865? And how many were enslaved? The Black Holocaust, a travesty that killed millions of African human beings, is the most underreported major event in world history. A major economic event for Europe and Asia, a near-fatal event for Africa, the seminal event in the history of every African American, if not every American, and most of us cannot answer the simplest question about it. Here is a sample of what you will get from the painstakingly researched, painfully honest *The Black Holocaust For Beginners*. The total number of slaves imported is not known. It is estimated that nearly 900,000 came to America in the 16th Century, 2.75 million in the 17th Century, 7 million in the 18th, and over 4 million in the 19th, perhaps 15 million in total. Probably every slave imported represented on average five corpses in Africa or on the high seas. The American slave trade therefore meant the elimination of at least 60 million Africans from their fatherland. *The Black Holocaust For Beginners*, part indisputably documented chronicle, part passionately engaging narrative, puts the tragic event in plain sight where it belongs. The long overdue book answers all of your questions sensitively and in great depth.

Sea Power and the Asia-Pacific Geoffrey Till, Patrick Bratton, 2012-02-07 With particular focus on the Asia Pacific region this book examines the rise and fall of sea powers In the Asia Pacific region there has been significant expansion of sea based economies together with burgeoning naval power Many claim that these processes will transform the world s future economic and security relationships The book addresses the question of to what extent the notion of Asia rising is reflected by and dependent on its developing sea power A central theme is the Chinese challenge to long term Western maritime ascendancy and what might be the consequences of this In order to situate current and future developments this book includes chapters which analyse what sea power means and has meant as well as its role both historic and contemporary in the rise and fall of great powers This book will be of much interest to students of naval power Asian politics strategic studies war and conflict studies IR and security studies
