Covid-19 and the Dialectics of Global Pandemics in Africa Munyaradzi Mawere, Bernard Chazovachii, 2021-10-01 The prevalence of global pandemics has been timeless and universal In 1918 the Spanish Flue grounded Spain and her neighbours In 1997 2014 and 2020 the Ebola virus wreaked havoc in West Africa in the same manner that polio had ravaged the globe Since 2019 the Coronavirus has forced most economies onto a downward spiral Despite concerted global attempts at observing World Health Organization guidelines the Coronavirus has been changing peoples lives forcing most economies onto their knees endangering lives and livelihoods making a mockery of global medicine and causing the widespread despair and helplessness that has come to be known as the new normal Unlike the other pandemics the mayhem complexities and dialectics caused by Covid 19 have been matchless requiring a systematic study and necessitating a volume like this one The volume s 16 well researched chapters argue that despite Covid 19 s enormous lessons and predictions about even greater future pandemics humanity can ill afford to relent in its determination to conquer the pandemic in the same way that human resolve has defeated past pandemic As such the volume provides hope and direction to the global community on how best to deal with Covid 19 and pandemics of similar or even higher magnitude in the future
