The Foundation Vault Lee F Herrick, 2015-01-14 When Larry Yapici permanent student at Berkeley in San Francisco sets off for Istanbul to claim an unexpected inheritance he has no idea that his first overseas trip will take such an unexpected and dangerous turn Within a few days he and his cousin Nedim from Germany are swept up in an adventure that is to take them to some of the most far flung inhospitable places on earth It also soon becomes clear that there are a number of parties with more than a passing interest in their questa quest that sets Larry and Nedim on a path of discovery that challenges them to question everything they had previously learnt about the history of mankind Whether they will survive these challenges is another matter Learning Space Jeremy Delamarter, 2025-01-13 As a genre science fiction is uniquely suited for highlighting and modeling the basic tenets of critical pedagogy that branch of educational philosophy and theory devoted equally to 1 exposing the hidden power structures embedded in educational practice and 2 articulating equitable and sustainable alternatives The science fiction novum that is the technological or scientific newness found within the text serves as a catalyst not only within the textual universe but also potentially within the universe of the reader New questions arise Previously hidden beliefs come to light Tacit assumptions are exposed The unfamiliar nova of science fiction can lead to new interrogations of our own all too familiar surroundings causing us to see our previously unquestioned worlds in a new way These new understandings are at the heart of critical pedagogy The learning spaces within science fiction texts can expose the fault lines within the educational structures of the real world Questions about what it means to be human about the proper limits of technological power or about the relationships and obligations of one species to another have profound implications for 21st century educators and learners particularly those who are interested in creating just and equitable learning spaces Learning Space Exploring Critical Pedagogy through Science Fiction draws on popular science fiction stories to provide current and future educators with the language concepts vocabulary and practices to cast a critical lens upon their own learning spaces and their own pedagogical practices For example a critical examination of the way that Yoda trains Luke Skywalker in The Empire Strikes Back reveals a great deal about the insidious nature of deficit thinking assuming that students learn best when they empty their minds and remain passive The assumed hierarchical power structure between teacher and student and the assumed relationship between learners and the knowledge with which they are supposed to be filled all of these are called into question when viewed through a critical lens The more we recognize the injustice in Yoda's pedagogy the more we might begin to see it in our own Similarly Isaac Asimov's classic Foundation trilogy imagines a world in which mathematical modeling and statistical computation are used not only to predict what people might do but instead to determine what they should do This kind of algorithmic determinism is unfortunately common in contemporary education and yet far too few educators and learners recognize just how much of their own agency has been given over to the machines By highlighting the algorithmic inequities in the world of Asimov's text we begin to recognize similar inequities at play in our

own world Ultimately this book uses science fiction to highlight educational inequities in such wide ranging topics as standard English literary canons machine learning notions of academic dishonesty epistemicide inequitable school discipline and more More importantly however it provides a framework for moving forward giving current and future educators the critical knowledge and skills both to recognize pedagogical injustice and to create viable just and sustainable alternatives
