England in 1819 James Chandler, 1999-06-26 1819 was the annus mirabilis for many British Romantic writers and the annus terribilis for demonstrators protesting the state of parliamentary representation In 1819 Keats wrote what many consider his greatest poetry This was the year of Shelley's Prometheus Unbound The Cenci and Ode to the West Wind Wordsworth published his most widely reviewed work Peter Bell and the craze for Walter Scott's historical novels reached its zenith Many of these writings explicitly engaged with the politics of representation in 1819 especially the great movement for reform that was fueled by threats of mass emigration to America and came to a head that August with an unprovoked attack on unarmed men women and children in St Peter's Field Manchester a massacre that journalists dubbed Peterloo But the year of Peterloo in British history is notable for more than just the volume value and topicality of its literature Much of the writing from 1819 argues James Chandler was acutely aware

not only of its place in history but also of its place as history a realization of a literary spirit of the age that resonates strongly with the current return to history in literary studies Chandler explores the ties between Romantic and contemporary historicism such as the shared tendency to seize a single dated event as both important on its own and as a case testing general principles To animate these issues Chandler offers a series of cases of his own built around key texts from 1819

The New Statesman, 1924 **Editing the Nation's Memory**, 2015-07-14 Europe's nation states emerged from a complex of nineteenth century developments in which cultural consciousness raising played a formative role The nineteenth century reflection on Europe's national identities involved a re-inventory and revalorisation of the vernacular cultural past and above all the nation's literary heritage Everywhere in Europe foundational texts including medieval epics and romances ancient laws and chronicles were retrieved from their obscure repositories In new printed editions prepared according to the emerging academic standards of textual scholarship they were appropriated contested and canonised as public symbols of the nation's permanence in history This often neglected but crucially important Europe-wide process of editing the nation's memory involved old states and emerging nations large and small countries metropolitan and peripheral regions it straddled politics the academic professionalization of textual scholarship and of the human sciences and literary taste This collection of studies by outstanding specialists offers a comparative synopsis on exemplary cases from all corners of the European continent Metaphysics William H. Walsh, 2019-03-06 Originally published in 1963 An outline of the metaphysical positions held by such major philosophers as Plato Aristotle Descartes Hegel Kant Hume Moore Bradley Wittgenstein The author maintains controversially that metaphysical arguments have a close bearing on religious and moral beliefs Military Operations, France and Belgium, 1914-1918 Sir James Edward Edmonds, 1925 *Military Operations* Sir James Edward Edmonds, 1926 **British Submarines at War** Edwyn Gray, 2016-01-31 Originally published in 1970 and out of print for nearly thirty years this book has already earned its place as a classic of submarine history by an author with an international reputation for being second to none in evoking the claustrophobic horror of war beneath the waves Accurate in detail yet written with humanity and humour it tells the story of Britain's pioneer submarines during the 1914-1918 War during which their crews battled courageously in atrocious conditions against a skilled and ruthless enemy and an equally unforgiving sea 2001 marks the centenary of Britain's Submarine Service introduced into the Royal Navy in the face of opposition from virtually every flag officer in the fleet The dedicated enthusiasts who made up their crews were derided as members of The Trade but they fought the Edwardian Naval Establishment as fiercely as they were later to fight the enemy And Victory was their reward on both occasions Freshly illustrated this second edition is a timely tribute to the gallant pioneers who created the legacy of dogged courage determination and standards of excellence which remain the proud hallmarks of the Royal Navy's submarine service today **British Housebuilders** Fred Wellings, 2008-04-15 British Housebuilders is the first comprehensive account of the corporate history of the twentieth century speculative housebuilding industry the firms that

supplied those houses and the entrepreneurs who created those firms The transition from the local housebuilders of the 1930s through the regional diversification of the 1960s to the national housebuilders of today is charted via a series of industry league tables The rationale for the growth in national firms is analysed The conventional explanation of economies of scale is rejected instead the stock market is found to play a key role both in facilitating acquisitions and in demanding growth from its constituent companies The supply side analysis also addresses the frequent corporate failures succession issues lack of focus and the 1974 and 1990 recessions have played their part in equal measure British Housebuilders provides the first opportunity to review the evidence drawn from a century of speculative housebuilding it is only with this historical perspective that sound judgements can be made on the corporate role in housebuilding *The Dial* Francis Fisher Browne,1888 **American Monthly Review of Reviews** Albert Shaw,1925 British Models of Art Collecting and the American Response Dr Inge Reist,2014-10-28 This collection of fourteen essays by distinguished art and cultural historians examine points of similarity and difference in British and American art collecting Half the essays examine the trends that dominated the British art collecting scene of the nineteenth century Others focus on American collectors using biographical sketches and case studies to demonstrate how collectors in the United States embellished the British model to develop their own often philanthropic approach to art collecting Lessons from the British and French New Towns David Fée,Bob Colenutt,Sabine Coady Schäbitz,2020-11-18 This book explores the evolution of New Towns in France and the UK in a number of areas governance planning and heritage and assess whether their legacy can inspire current planned settlements *British Interrogation Techniques in the Second World War* Sophie Jackson,2011-11-30 The British system of interrogation has always been distinctly different from other countries Subtler quieter and far more devious than its contemporaries it has been admired by those who have inadvertently succumbed to it So much so that the Nazis adopted some of the British methods in their own intelligence operations During the Second World War the system became highly developed and vast numbers of people were employed in the collating and recovery of information Vital data regarding military advances such as the Enigma machine and the Tiger Tank were wrung from prisoners not by force but by trickery and deceit The eccentric quirky but also very successful wartime interrogation methods of the British are revealed in this book including their triumphant discoveries and also their occasional disastrous mistake British Sea Anglers' Society's Quarterly ,1911 **The American Review of Reviews** Albert Shaw,1925 Mammoth Books presents The Best British Crime Omnibus: Volume 7, 8 and 9 Maxim Jakubowski,2012-08-30 122 fantastic stories from Britain s best crime writers For ten years the Mammoth Best British Crime series has been publishing an annual volume of the most outstanding crime and mystery short fiction published in the UK Over 400 stories by the very best writers in the field have been published Contributors have included among many others Mark Billingham Liza Cody Roger Jon Ellory Reginald Hill Peter James Simon Kernick Alexander McCall Smith Val McDermid John Mortimer Anne Perry Ian Rankin Derek Raymond and Andrew Taylor On several

History of the British Flora Godwin, 1984-07-19 The chief aim of this book is the reconstruction of the processes and events that have determined the present flora and vegetation of the British Isles first of all through the long ages when natural conditions prevailed and cycles of glaciations and recessions and slow geological processes were in charge and afterwards through the nearer and much shorter span of time during which from the Neolithic onwards human interference has progressively and severely altered the scene This is an exercise in biogeography that Darwin called that grand subject that almost keystone to the laws of nature But instead of adopting Darwin's conjectural approach based largely on circumstantial evidence what this 1975 second edition achieves is a factual reconstruction of events by records of the actual presence of individual species or genera in large numbers at particular sites and specified times through the geological and historic record
