The Kenyan Cut Flower Industry and Global Market Dynamics Andreas Gemählich, 2022 Investigates the production trade and consumption of the bouquets sold in European supermarkets and the consequences of this for the globalised economy From a macro perspective it appears that the cut flower industry has changed into a buyer driven value chain with corporate retailers as the new lead firms Yet as this book shows this is insufficient to explain how new trade relations come into being

and the consequences of this not only for global economics but for the producers climate change and rural livelihoods As the retailers and wholesalers of the flower industry in the West linked directly to producers in the Global South trade relations changed fundamentally and this critical new book explores the complexities of the power asymmetries and the way in which corporate retailers have shaped the market to promote their own interests as well as the role non economic actors played This book examines in detail the situation at Lake Naivasha Kenya which has played a central part within this new market order Since the 1970s the area has developed into one of the most important production areas for the ready made bouquets that sell so cheaply in European supermarkets For the flower growers themselves however coping with the new conditions of supply and demand the new market order has brought financial precariousness Farms needed to be flexible in the production and marketing of their flowers Yet while they were able to expand their production and achieve more stable employment conditions this has not resulted in significantly higher remuneration The rapidly changing economic situation has also had a profound impact not only on local stakeholders but on the environment where there is intensified competition for resources and new production technologies Published in association with the Collaborative Research Centre FUTURE RURAL AFRICA funded by the German Research Council DFG w market order Since the 1970s the area has developed into one of the most important production areas for the ready made bouquets that sell so cheaply in European supermarkets For the flower growers themselves however coping with the new conditions of supply and demand the new market order has brought financial precariousness Farms needed to be flexible in the production and marketing of their flowers Yet while they were able to expand their production and achieve more stable employment conditions this has not resulted in significantly higher remuneration The rapidly changing economic situation has also had a profound impact not only on local stakeholders but on the environment where there is intensified competition for resources and new production technologies Published in association with the Collaborative Research Centre FUTURE RURAL AFRICA funded by the German Research Council DFG w market order Since the 1970s the area has developed into one of the most important production areas for the ready made bouquets that sell so cheaply in European supermarkets For the flower growers themselves however coping with the new conditions of supply and demand the new market order has

Supply Chain Cinema Kay

Dickinson,2024-02-08 Why are big budget films typically made across an array of seemingly dissociated sites Supply Chain Cinema shows how the production journeys of such films exemplify the principles of the supply chain whose core imperative is to nimbly and opportunistically manufacturing wherever is most amenable and efficient Through extensive on site investigations and in depth interviews with film professionals Kay Dickinson delivers nuanced insight into working practices in the UK and the UAE Among the sites she examines is Warner Bros permanent base at Leavesden Studios near London From tax breaks designed to attract foreign projects to infrastructures logistical support and expertise offered she considers why Hollywood giants elect to make more of their films in Britain than in the USA Dickinson goes on to show how the UK s ambitions to enlarge its creative economies has opened up a host of competitive advantages with British higher education increasingly fashioned to conform to the needs of border hopping enterprise thus generating a workforce keenly adapted to the demands of blockbuster moviemaking

Below the Stars Kate Fortmueller,2021-07-13 Despite their considerable presence in Hollywood extras and working actors have received scant attention within film and media studies as significant contributors to the history of the industry Looking not to the stars but to these supporting players in film television and recently streaming programming Below the Stars highlights such actors as precarious laborers whose work as freelancers has critically shaped the entertainment industry throughout the twentieth and twenty first centuries By addressing ordinary actors as a labor force Kate Fortmueller proposes a media industry history that positions underrepresented and quotidian experiences as the structural elements of the culture and business of Hollywood Resisting a top down assessment Fortmueller explores the wrangling of labor unions and guilds that advocated for collective action for everyday actors and helped shape professional norms She pulls from archival research in person interviews and firsthand observation to examine

a history that cuts across industry boundaries and situates actors as a labor group at the center of industrial and technological upheavals with lasting implications for race gender and labor relations in Hollywood
