

# 2019 VCE Business Management examination report

## General comments

The 2019 examination was generally handled well by students. Most questions were attempted, which is a sign of confidence in their understanding of the course content.

However, while many students appeared to have learned the required knowledge, some found it difficult to apply that theoretical knowledge effectively to the scenarios provided in the examination material. There was notably poorer performance on questions for which a key component was the application of theoretical knowledge to a real-life or simulated situation.

Where options are offered, students should choose carefully. It appeared that some students chose the first option that came to mind, rather than considering the task and selecting the option that would best allow them to fully respond to the question.

Focus is also needed on the key task words in the questions. If a question asks a student to analyse, then full marks for that question will only be available for answers that include analysis. There is an expectation that the task word 'compare' calls for consideration of both similarities and differences, so a response that does not include both cannot achieve full marks for a comparison question. Students are expected to demonstrate that they have an understanding of what is required to effectively address each task word, so they can respond to questions accurately.

## Specific information

**Note: Student responses reproduced in this report have not been corrected for grammar, spelling or factual information.**

This report provides sample answers or an indication of what answers may have included. Unless otherwise stated, these are not intended to be exemplary or complete responses.

The statistics in this report may be subject to rounding resulting in a total more or less than 100 per cent.
