Vision And Visual Perception The Conscious Base Of Seeing:

Vision and Visual Perception Duco A. Schreuder, 2014-12-03 Vision is about insight and visual perception is about cognition and they form the foundation of how we see the world Duco A Schreuder a physicist and psychologist explores the finer details of each in this groundbreaking book that explores human consciousness and perception Sharing virtually everything he s learned over a varied career spanning more than sixty years he examines a wide array of topics including how we understand what we visually process how we store and retrieve information the role that neurons play in how what we see and much more While Schreuder isn t afraid to disagree with other leading thinkers he relies on science and focuses on the facts behind it so you can understand lighting visual perception engineering design and applied and experimental physics Looking is about insight whereas seeing is about knowledge and you need to know how each one works to truly understand how humanity views the world Whether you re an illuminating engineer considering the fundamentals of the trade or a student or professional in an allied discipline you ll be well served by taking a closer look at Vision and Visual Perception

Documenting Syria Josepha Ivanka Wessels, 2019-07-11 Syria is now one of the most important countries in the world for the documentary film industry Since the 1970s Syrian cinema masters played a defining role in avant garde filmmaking and political dissent against authoritarianism After the outbreak of violence in 2011 an estimated 500 000 video clips were uploaded making it one of the first YouTubed revolutions in history This book is the first history of documentary filmmaking in Syria Based on extensive media ethnography and in depth interviews with Syrian filmmakers in exile the book offers an archival analysis of the documentary work by masters of Syrian cinema such as Nabil Maleh Ossama Mohammed Mohammed Malas Hala Al Abdallah Hanna Ward Ali Atassi and Omar Amiralay Joshka Wessels traces how the works of these filmmakers became iconic for a new generation of filmmakers at the beginning of the 21st century and maps the radical change in the documentary landscape after the revolution of 2011 Special attention is paid to the late Syrian filmmaker and pro democracy activist Bassel Shehadeh and the video resistance from Aleppo and Raqqa against the regime of President Bashar al Assad and the Islamic State An essential resource for scholars of Syrian Studies this book will also be highly relevant to the fields of media conflict research anthropology and political science

Written by prominent active researchers in the field Presents broad coverage of perception and cognition Considers perception and cognition in the context of the thought of the past half century Contains extensive references excellent resource Alhacen's Theory of Visual Perception Alhazen, A. Mark Smith, 2001 Sometime between 1028 and 1038 Ibn al

Haytham completed his monumental optical synthesis Kitab al Manazir Book of Optics By no later than 1200 and perhaps somewhat earlier this treatise appeared in Latin under the title De aspectibus In that form it was attributed to a certain Alhacen These differences in title and authorial designation are indicative of the profound differences between the two versions Arabic and Latin of the treatise In many ways in fact they can be regarded not simply as different versions of the same work but as different works in their own right Accordingly the Arab author Ibn al Haytham and his Latin incarnation Alhacen represent two distinct sometimes even conflicting interpretive voices And the same holds for their respective texts To complicate matters Alhacen does not represent a single interpretive voice There were at least two translators at work on the Latin text one of them adhering faithfully to the Arabic original the other content with distilling even paraphrasing the Arabic original Consequently the Latin text presents not one but at least two faces to the reader This two volume critical edition represents fourteen years of work on Dr Smith s part Awarded the 2001 J F Lewis Award **The Routledge**

Vision beyond Visual Perception Borko Kovačević,Ian Richards,Junichi Toyota,2017-05-11 Vision is crucial for the survival of all animals However as this book shows its importance does not simply lie in visual perception but is rather deeply rooted in human physiology psychology and culture For instance conceptual metaphors often involve vision such as Seeing is Touching and Eyes are Limbs among others However this Anglo centric linguistic view belies the fact that vision is not a universally preferred source for metaphor and less studied languages spoken in the four corners of the world can present cases that are unfamiliar to those who are only acquainted with Indo European languages and cultures In fact other types of perception such as hearing are often preferred as a source of comprehension in a number of languages This volume studies various issues concerning vision both synchronically and diachronically Its discussion involves specialists from different disciplines ranging from cognitive science to literary scholarship It also covers a wide range of geographical regions such as Africa and Asia As such this volume will serve to shed light on the integration of disciplines concerning vision

Projections of the Consciousness Waldo Vieira,2021-03-11 The facts narrated here continue to be experienced by billions of people every night as they have ever since antiquity The difference now is that communication of these experiences is increasing with every year that passes without the folkloric and mystical connotations which have been attached to them for thousands of years

Neural Correlates of Consciousness Thomas Metzinger,2000 This book brings together an international group of neuroscientists and philosophers who are investigating how the content of subjective experience is correlated with events in the brain The fundamental methodological problem in consciousness research is the subjectivity of the target phenomenon the fact that conscious experience under standard conditions is always tied to an individual first person perspective The core empirical question is whether and how physical states of the human nervous system can be mapped onto the content of conscious experience The search for the neural correlates of consciousness NCC has become a highly active field of investigation in recent years Methods such as single cell recording in monkeys and brain imaging and electrophysiology in humans applied to such phenomena as blindsight implicit explicit cognition and binocular rivalry have generated a wealth of data The same period has seen the development of a number of theories about NCC location This volume brings together the
