saturated with data We are regularly presented with data in words tables and graphics Students from many academic fields are now expected to be educated about data in one form or another Yet the typical sequence of courses introductory statistics and research methods does not provide sufficient information about how to focus in on a research question how to access data and work with datasets or how to present data to various audiences Principles of Data Management and Presentation addresses this gap Assuming only that students have some familiarity with basic statistics and research methods it provides a comprehensive set of principles for understanding and using data as part of a research project including how to narrow a research topic to a specific research question how to access and organize data that are useful for answering a research question how to use software such as Stata SPSS and SAS to manage data how to present data so that they convey a clear and effective message A companion website includes material to enhance the learning experience specifically statistical software code and the datasets used in the examples in text format as well as Stata SPSS and SAS formats Visit www.ucpress.edu/go/datamanagement Downloads tab

A Gentle Introduction to Stata, Second Edition Alan C. Acock, 2008-09-03 *A Gentle Introduction to Stata Second Edition* is aimed at new Stata users who want to become proficient in Stata After reading this introductory text new users will not only be able to use Stata well but also learn new aspects of Stata easily Acock assumes that the user is not familiar with any statistical software This assumption of a blank slate is central to the structure and contents of the book Acock starts with the basics for example the portion of the book that deals with data management begins with a careful and detailed example of turning survey data on paper into a Stata ready dataset on the computer When explaining how to go about basic exploratory statistical procedures Acock includes notes that should help the reader develop good work habits This mixture of explaining good Stata habits and good statistical habits continues throughout the book Acock is quite careful to teach the reader all aspects of using Stata He covers data management good work habits including the use of basic do files basic exploratory statistics including graphical displays and analyses using the standard array of basic statistical tools correlation linear and logistic regression and parametric and nonparametric tests of location and dispersion Acock teaches Stata commands by using the menus and dialog boxes while still stressing the value of do files In this way he ensures that all types of users can build good work habits Each chapter has exercises that the motivated reader can use to reinforce the material The tone of the book is friendly and conversational without ever being glib or condescending Important asides and notes about terminology are set off in boxes which makes the text easy to read without any convoluted twists or forward referencing Rather than splitting topics by their Stata implementation Acock chose to arrange the topics as they would be in a basic statistics textbook graphics and postestimation are woven into the material in a natural fashion Real datasets such as the General Social Surveys from 2002 and 2006 are used throughout the book The focus of the book is especially helpful for those in psychology and the social sciences because the presentation of basic statistical modeling is supplemented with discussions of effect sizes and standardized coefficients
