

How a Keurig Coffee Maker Works

The Keurig B60 coffee maker is one of several machines, which will brew a cup of coffee using the single serve "K-Cup". The basic operation of the machine is that it stores water on a side tank, pumps it into a water heater and then uses an air pump to force the hot water through the "K-Cup" and into your coffee cup. This all sounds simple but, of course, it isn't.
