An average bee hive consists of about 20,000 bees. Within the colony, there are three types of bees, each with its own important job. One queen lives in a hive, and her only job is to fill the hive with eggs. In fact, a queen will lay about 1,500 eggs in just one day! Male bees are called drones. Their only job is to mate with the queen. Worker bees, on the other hand, are extremely busy. They are female bees that lay no eggs. Their many jobs include cleaning, gathering pollen, building new comb, and taking care of the larvae (baby bees).

fact from an opinion is an important reading skill to master. It allows the reader to make a sound judgment about the information presented in a story. To introduce this skill, explain the difference between a fact and an opinion. Fact: a fact is something that is true about a subject. It can be tested and proven. Opinion: an opinion is what someone thinks or feels about a subject.

Skill Specific Activities: There are 15 high interest short stories in this selection, including a variety of fiction and non-fiction topics. The follow-up questions guide students to Facts and Opinions. Each story is numbered instead of having a title. The last question for each story asks the students to give the story a title. This important activity helps to determine the student's level of understanding the story's main idea.

Visual Lesson: Each story has an engaging illustration designed to bring the story to life and help capture the interest of reluctant readers. To help sharpen inference skills, students can be asked to use the illustration to predict what the story is about.

Teaching Opportunities: These targeted activities are great for one-on-one intervention, small groups of students at multiple skill levels, or whole class participation. Can be used for remediation, review, and transition classes.
