The Fault In Our Stars Vic:

The Fault in Our SARS Rob Wallace, 2023-02-02 Proposes the pragmatic changes we must make to survive COVID and the worst of the new diseases on the horizon The Trump administration's neglect and incompetence helped put half a million Americans in the ground dead from COVID 19 Joe Biden was elected president in part on the promise of setting us on a science driven course correction but a little more than a year later another half a million Americans were killed by the virus What happened In The Fault in Our SARS evolutionary epidemiologist Rob Wallace catalogs the Biden administration's failures in controlling the outbreak He also shows that beyond matters of specific political persona or party it was a decades long structural decline associated with putting profits ahead of people that gutted U S public health COVID 19 isn't just an American tragedy Each in its own way countries around the world following the profit first model failed their people Global vaccination campaigns were bottled up by efforts to protect pharmaceutical companies intellectual property rights Economies were treated as somehow more real than the people and ecologies upon which they depend Frustrated populations pushed back against lockdowns abuses of governmental trust and fair or not the very concept of public health A social rot meanwhile wended its way into the heart of the sciences that tasked with controlling disease serve the systems that helped bring about COVID 19 in the first place In The Fault in Our SARS Wallace and an array of invited contributors aim to strip down the capitalist social psychology that in effect protected the SARS virus The team proposes instead new approaches in health and ecology that appeal both to humanity's highest ideals and the pragmatic changes we must make to survive COVID and the worst of the new diseases on the horizon
