assessing or treating clinician and for the patient's clinic or medical center. Virtually all mental health clinicians with an active caseload will see individuals with such issues. This Handbook is comprised of chapters by leading clinicians, researchers, and scholars in this area of practice. It presents a framework for learning the skills needed for assessing and working competently with such high-risk individuals. Chapters draw a distinction between behavioral emergencies and crises and between emergency intervention and crisis intervention. The book examines the interrelated aspects of the major behavioral emergencies that is, for example, the degree to which interpersonal victimization may lead an individual on a pathway to later suicidal or violent behavior or the degree to which suicidal individuals and violent individuals may share certain cognitive characteristics.
