 development as something that can complement with their own work.

Present-day climate conditions imposed that conditions on early, dry-bake ceramic vessels. Experiments have demonstrated that clay vessels containing water, heated over an open flame, if the early vessels existed, the clay vessels that they used, would have been destroyed. Thus, if the early vessels existed, they were not used to cook food over an open flame, but rather, they were used to cook food in a "water bath" or "double boiler" system, using the flame to heat the water, and the water to cook the food. This is a very different cooking method from the one used in modern times, and it is a method that is not used in modern times.
