Fleck,2006 Dissection can be an aspect of scientific education that can make some parties queasy but it is a fascinating way to learn more about the different body systems their operations and basic animal anatomy Entering the world of pig dissection can make budding scientists even more squeamish but they need never fear as this site allows these individuals the opportunity to engage in a bit of virtual pig dissection Originally created by Professor Earl W Fleck of Whitman College s biology department the site lets users go inside the pig to learn about its various systems via a set of high quality color photographs which can be viewed at different angles and perspectives Of course what would a lab be without a quiz Rounding out the site visitors can take short quizzes on the pig s anatomy and such From The Scout Report Copyright Internet Scout Project 1994 2006 <http://scout.wisc.edu> *Virtual Pig Dissection* , Steve L Michaud of the Maine School Administrative District 27 presents an online guide to pig dissection The guide highlights the pig s external anatomy as well as its respiratory circulatory digestive and reproductive systems *Virtual Fetal Pig Dissection as an Agent of Knowledge Acquisition and Attitudinal Change in Female High School Students* Rebecca S. Maloney,2002 One way to determine if all students can learn through the use of computers is to introduce a lesson taught completely via computers and compare the results with those gained when the same lesson is taught in a traditional manner This study attempted to determine if a virtual fetal pig dissection can be used as a viable alternative for an actual dissection for females enrolled in high school biology classes by comparing the knowledge acquisition and attitudinal change between the experimental virtual dissection and control actual dissection groups Two hundred and twenty four students enrolled in biology classes in a suburban all girl parochial high school participated in this study Female students in an all girl high school were chosen because research shows differences in science competency and computer usage between the genders that may mask the performance of females on computer based tasks in a science laboratory exercise Students who completed the virtual dissection scored significantly higher on practical and objective tests that were used to measure knowledge acquisition Attitudinal change was measured by examining the students attitudes toward dissections computer usage in the classroom and toward biology both before and after the dissections using pre and post surveys Significant results in positive gain scores were found in the virtual dissection group2s attitude toward dissections and their negative gain score toward virtual dissections Attitudinal changes toward computers and biology were not significant A purposefully selected sample of the students were interviewed in addition to gathering a sample of the students2 daily dissection journals as data highlighting their thoughts and feelings about their dissection experience Further research is suggested to determine if a virtual laboratory experience can be a substitute for actual dissections or may serve as an enhancement to an actual dissection
