GENERAL DESCRIPTION

The CR1000 is the perfect solution for applications that require the operator to monitor and control more than just a single device. With two serial ports and an Ethernet port, these HMI displays can connect to multiple serial and Ethernet devices simultaneously, including PLCs, motor drives, bar code scanners, etc.

The CR1000 performs the functions of a multiple protocol converter, using two high-speed serial communications ports and a 10/100 Base-TX Ethernet port. The Ethernet port supports up to four protocols simultaneously, allowing dissimilar Ethernet based products to communicate with one another. The SD card slot can be used to load the unit's configuration file, allowing configuration changes to be made and saved to the card for later transfer.

The CR1000 range of HMIs is programmed with Red Lion's Crimson 3.1 or 3.2 software. Crimson offers easy to use drag and drop communications configuration, while the embedded image library allows the programmer to create intuitive screens and prompts for the operator. The Crimson software is available as a no charge download from Red Lion's website.

SAFETY SUMMARY

All safety related regulations, local codes as well as instructions that appear in this document or on equipment must be observed to ensure personal safety and to prevent damage to either the device or equipment connected to it.

Do not use these products to replace proper safety interlocking.
