bringing together contributions from researchers working in Brazilian Argentinean Chilean Colombian and Mexican universities The stress on the regional provenance of the authors is not intended to suggest the existence of something like a Latin American history and philosophy of biology supposedly endowed with distinctive features On the contrary the editors firmly believe that advances in this field can be achieved only by stimulating the integration in the international debate Based on this assumption the book focuses on two topics life and evolution and presents a selection of contributions addressing issues such as the history of the concept of life the philosophical reflection on life manipulation and life extension the structure and development of evolutionary theory as well as human evolution Life and Evolution Latin American Essays on the History and Philosophy of Biology will provide the international reader with a rather complete picture of the ongoing research in the history and philosophy of biology in Latin America offering a snapshot of this dynamic community It will also contribute to contextualize and develop the debate concerning life and evolution and the relation between the two phenomena

Science in Negotiation Jessica Espey, 2022-11-28 This book explores the role of scientific evidence within United Nations UN deliberation by examining the negotiation of the Sustainable Development Goals SDGs endorsed by Member States in 2015 Using the SDGs as a case study this book addresses a key gap in our understanding of the role of evidence in contemporary international policy making It is structured around three overarching questions 1 how does scientific evidence influence multilateral policy development within the UN General Assembly 2 how did evidence shape the goals and targets that constitute the SDGs and 3 how did institutional arrangements and non state actor engagements mediate the evidence to policy process in the development of the SDGs The ultimate intention is to tease out lessons on global policy making and to understand the influence of different evidence inputs and institutional factors in shaping outcomes To understand the value afforded to scientific evidence within multilateral deliberation a conceptual framework is provided drawing upon literature from policy studies and political science including recent theories of evidence informed policy making and new institutionalism It posits that the success or failure of evidence informing global political processes rests upon the representation and access of scientific stakeholders levels of community organisation the framing and presentation of evidence and time including the duration over which evidence and key conceptual ideas are presented Cutting across the discussion is the fundamental question of whose evidence counts and how expertise is defined The framework is tested with specific reference to three themes that were prominent during the SDG negotiation process public health articulated in SDG 3 urban sustainability articulated in SDG 11 and data and information systems which were a cross cutting theme of the dialogue Within each scientific communities had specific demands and through an exploration of key literature including evidence inputs and UN documentation as well as through key informant interviews the translation of these scientific ideas into policy priorities is uncovered The intended audiences of this book include academic practitioners studying evidence to policy processes multilateral negotiation and or UN policy planning The book also intends to provide

useful insights for policy makers including UN diplomats officials and staff working to improve the quality of evidence communication and uptake within multilateral institutions Finally it aims to support the whole global academic and scientific community including students of public policy and political science by providing insights on how to input into influence and even shape international evidence informed policy making *Fostering Values Education and Engaging Academic Freedom amidst Emerging Issues Related to COVID-19*, 2023-11-20 This volume contributes to the advancement of comparative education in the world more specifically in expanding understandings of the discourse of comparative education vis vis educational transformation Throughout the text three critical elements that reflect comparative education as an open inconclusive discourse come up 1 There is sufficient pedagogical space for dissonance It is always possible to compare one s own authenticity with the epistemological position others hold dear and argue for 2 The contributions in this book should not be read as absolute pieces of writing as that would undermine the flexible nature of education It is important to point out that the opinions of the authors are temporary moments of attachment to persuasive claims However these claims are not cast in stone as new views continue to emerge from epistemological re positioning 3 Our own reading of the book corroborates our interest in comparative education as a continuous discourse in the making The contributions of scholars at the third symposium organized by WCCES provided a platform for them to pursue their knowledge interests In addition these interests have and will or ought never to be homogenous for that would be incommensurate with a defensible practice of comparative education *Handbook of Parenting* Marc H. Bornstein, 2019-02-01 This highly anticipated third edition of the Handbook of Parenting brings together an array of field leading experts who have worked in different ways toward understanding the many diverse aspects of parenting Contributors to the Handbook look to the most recent research and thinking to shed light on topics every parent professional and policymaker wonders about Parenting is a perennially hot topic After all everyone who has ever lived has been parented and the vast majority of people become parents themselves No wonder bookstores house shelves of how to parenting books and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice However almost none of these is evidence based The Handbook of Parenting is Period Each chapter has been written to be read and absorbed in a single sitting and includes historical considerations of the topic a discussion of central issues and theory a review of classical and modern research and forecasts of future directions of theory and research Together the five volumes in the Handbook cover Children and Parenting the Biology and Ecology of Parenting Being and Becoming a Parent Social Conditions and Applied Parenting and the Practice of Parenting Volume 4 Social Conditions and Applied Parenting describes socially defined groups of parents and social conditions that promote variation in parenting The chapters in Part I on Social and Cultural Conditions of Parenting start with a relational developmental systems perspective on parenting and move to considerations of ethnic and minority parenting among Latino and Latin Americans African Americans Asians and Asian Americans Indigenous parents and immigrant parents The section concludes with considerations of

disabilities employment and poverty on parenting Parents are ordinarily the most consistent and caring people in children s lives However parenting does not always go right or well Information education and support programs can remedy potential ills The chapters in Part II on Applied Issues in Parenting begin with how parenting is measured and follow with examinations of maternal deprivation attachment and acceptance rejection in parenting Serious challenges to parenting some common such as stress and depression and some less common such as substance abuse psychopathology maltreatment and incarceration are addressed as are parenting interventions intended to redress these trials
