Technical Communication John M. Lannon, Laura J. Gurak, 2014. Technical Communication offers complete coverage of technical communication, business communication, and professional writing in a user-friendly writing style. The topics move from basic foundational concepts to chapters on research, visuals, style, document design, usability, and finally to specific documents: basic workplace correspondence to more complex documents, technologies, and oral presentations. The appendix includes thorough coverage of MLA, APA, and CSE Council of Science Editors documentation styles and a handbook of grammar, mechanics, and usage. All descriptions and instructions for creating technical documents are accompanied by clear annotated model documents. In addition, graphic illustrations appear throughout the book to make abstract concepts easy to understand. Checklists and Projects provide plentiful opportunities to learn and reinforce chapter topics. Teaching Professional and Technical Communication Tracy Bridgeford, 2018-09-21. Teaching Professional and Technical Communication guides new instructors in teaching professional and technical communication (PTC). The essays in this volume provide theoretical and applied discussions about the teaching of this diverse subject, including relevant pedagogical approaches, how to apply practical aspects of PTC theory, and how to design assignments. This practicum features chapters by prominent PTC scholars and teachers on rhetoric, style, ethics, design, usability, genre, and other central concerns of PTC programs. Each chapter includes a scenario or personal narrative of teaching a particular topic, provides a theoretical basis for interpreting the narrative, illustrates the practical aspects of the approach, describes relevant assignments, and presents a list of questions to prompt pedagogical discussions. Teaching Professional and Technical Communication is not a compendium of best practices but instead offers a practical collection of rich, detailed narratives that show inexperienced PTC instructors how to work most effectively in the classroom.
