

Unit 9: Globalization

C. 1900 - Present / Exam Weighting: 8-10%

Topic 9.1 Advances in Technology and Exchange After 1900

Learning Objective

Explain how the development of new technologies changed the world from 1900 to present.

Historical Developments

New modes of communication—including radio communication, cellular communication, and the internet—as well as transportation, including air travel and shipping containers, reduced the problem of geographic distance.

Energy technologies, including the use of petroleum and nuclear power, raised productivity and increased the production of material goods.

More effective forms of birth control gave women greater control over fertility, transformed reproductive practices, and contributed to declining rates of fertility in much of the world.

The Green Revolution and commercial agriculture increased productivity and sustained the earth's growing population as it spread chemically and genetically modified forms of agriculture.

Medical innovations, including vaccines and antibiotics, increased the ability of humans to survive and live longer lives.

1. Choose one new mode of communication and explain how it reduced the problem of geographic distance.
Cellular communication made communicating over long distances easier and more accessible.
2. Choose one new mode of transportation and explain how it reduced the problem of geographic distance.
Air travel allowed for faster travel over a long distance.
3. Choose one new energy technology and explain how it raised productivity and the production of material goods.
Petroleum was a cleaner energy source and was more renewable than other sources such as coal or wood.
4. Explain the role of birth control in creating more opportunities for women in the 20th century.
It allowed for control over fertility.
5. What was the Green Revolution?
The increase in agricultural production that was made possible by new technological advances and farming methods.
6. Name two positive impacts of the Green Revolution.
Increased food production & increased quality of crops.
7. Name two negative outcomes of the Green Revolution.
Soil degradation caused by chemical pesticides and loss of biodiversity.
