the National Council for Science and the Environment's 8th National Conference on Science Policy and the Environment. After presenting a lucid narrative of the science behind climate change and its solutions, *Climate Solutions Consensus* presents 35 practical, results-oriented approaches for minimizing climate change and its impacts. It clearly spells out options for technological, societal, and policy actions. And it deals head-on with controversial topics including nuclear energy, ocean fertilization, and atmospheric geo-engineering. One of the book's key conclusions is that climate solutions are about much more than energy sources. They involve re-examining everything people do with an eye toward minimizing climate impacts. This includes our eating habits, consumption patterns, transportation, building and housing, forestry, land use, education, and more. According to these scientists, the time to act is now. With clarity and urgency, they tell us exactly what needs to be done to start reversing the driving factors behind climate change, minimizing their consequences, and adapting to what is beyond our power to stop.
