Telecommunications Law and Policy Stuart Minor Benjamin, James B. Speta, 2015 To access this book's 2018 Supplement please click [here](#) This book engages in advanced analysis of the key administrative constitutional and economic issues that arise in the various telecommunications settings The fourth edition has been revised to reflect the increasing importance of broadband and its regulation The book contains discussions and excerpts from legal materials to help readers understand current controversies regulatory strategies and the historical developments that led to them The authors have streamlined much of the older material to present key materials concisely and effectively Summaries and previews at the start of each set of readings help students know what to read for and questions at the end of each set encourage students to think critically about those materials The organization easily permits the selection of material for courses focused only on particular industries or only on particular types of regulation *Telecommunications Law and Regulation in Nigeria* Uchenna Jerome Orji, 2018-12-19 The Nigerian telecommunications industry has continued to grow in a phenomenal manner following market liberalization reforms that commenced in the 1990s As of 2017 the telecommunications industry was one of the fastest growing economic sectors in Nigeria and the fourth largest contributor to the country's Gross Domestic Product The telecommunications industry however remains a highly technical and naturally dynamic industry that has not been a usual area for legal research in developing countries such as Nigeria This book bridges that gap in knowledge by providing an analysis of the legal and policy instruments that regulate the industry It comprises eleven chapters that discuss the historical evolution of telecommunications and its regulation the development of the Nigerian telecommunications industry from 1886 to 2017 the legal basis for the regulation of the industry the licensing and duties of service providers the regulation of network infrastructure the protection of consumers the regulation of competition interconnection universal access and environmental protection and the resolution of industry disputes This book will be useful to policy makers legislators regulators lawyers law students investors operators and consumers as well as any person interested in the Nigerian telecommunications industry **International Telecommunications Law and Policy** Uchenna Jerome Orji, 2019-01-18 Since the revolution in modern telecommunications that followed the invention of the telegraph telecommunication networks have provided channels for the fast delivery of communications across national borders This transnational nature of telecommunication networks have led to the establishment of international regulatory regimes on the subject On the other hand developing countries consider regional economic integration as a major strategy for promoting trade and development telecommunications have been seen within this context as a strategic tool for facilitating regional economic integration This has also led to the establishment of regional telecommunication regulatory regimes that aim to promote regional integration and regulatory harmonization This book discusses telecommunication regimes established by international and regional organizations such as the United Nations the International Telecommunication Union the World

Trade Organization the African Union the Economic Community of West African States and the Southern African Development Community among a number of others It will be relevant to policy makers regulators lawyers law students investors and telecommunication operators as well as any person interested in international and African regional telecommunication regimes *Telecommunications Law and Regulation* Ian Walden,2009-02-19 Since the last edition of the book was published there have been a number of important developments in the telecommunications industry for example the operational separation of BT in the UK which may prove a model for the rest of Europe in dealing with incumbent operators and the debate over network neutrality in the US which is dominating the roll out of the infrastructure Telecommunications Law and Regulation is fully updated and contains new chapters on technology and markets and capacity agreements Other topics addressed in this new edition include the consequences of convergence within an EU and international context including the blurring of conduit and content regulations the implications of IP and Next Generation Networks issues of communication privacy in the context of the war on terrorism and how these impact on the commercial operations of service providers the obtaining and trading of spectrum with governments and regulators looking to fully exploit the digital dividend and the application of ex post competition law to the sector as governments attempt to deregulate competitive markets The book examines all aspects of EU 2003 regime implementation issues and the proposed reforms arising from the 2006 review Written by leading experts in the field it offers comprehensive coverage of the law and regulatory structures relating to telecommunications It is essential reading for legal practitioners involved in the communications industry and of interest to management consultants bankers and accountants who will need to be aware of the legal implications of this fast changing area It is also a highly accessible and thought provoking book for postgraduate study **The Electronic Communications Code and Property Law** Falcon Chambers,2018-10-11 Life now without access to electronic telecommunications would be regarded as highly unsatisfactory by most of the UK population Such ready access would not have been achieved without methodical and ultimately enforceable means of access to the land on which to install the infrastructure necessary to support the development of an electronic communications network Successive governments have made such access a priority regarding it as a principle that no person should unreasonably be denied access to an electronic communications network or electronic communications services The enactment of the Telecommunications Act 1984 and its revision by the Communications Act in 2003 have played their role in the provision of an extensive electronic infrastructure in the UK while their reshaping by means of the Digital Economy Act 2017 will continue that process Throughout that process a little publicised series of struggles has taken place between telecommunications operators and landowners as they seek to interpret the Electronic Communications Code by which their rights and obligations have been regulated This book describes the problems that accompanied the Old Code which will continue to regulate existing installations and agreements and the intended solutions under the New Code The eminent team

of authors explain the background provisions and operation of the old code and the new one providing practical and jargon free guidance throughout It is sure to become the reference on this topic and is intended as a guide for telecommunications operators land owners and of course for their advisers in the legal and surveying professions All members of Falcon Chambers comprising nine Queen s Counsel and 30 junior barristers specialise in property law and allied topics including the various incarnations of the Electronic Communications Code Members of Falcon Chambers including all the authors of this new work have for many years lectured and written widely on the code and have appeared acting for both operators and landowners in many of the few reported cases on the subject of the interface between property law and the code including for example *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2010 *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2011 *Crest Nicholson Operations Ltd v Arqiva Services Ltd* 2015 *Brophy v Vodafone Ltd* 2017 *Searching the Law, 3d Edition* Frank Bae,Edward Bander,Francis Doyle,Joel Fishman,Paul Richert,2021-12-13

European and National Competition Law after Regulation 1/2003 Lúcio Tomé Feteira, 2015-12-08 If we can speak of the European Community's economic constitution we can assert that competition rules together with free movement rules form its core Notably implementation of the competition rules enshrined in Articles 81 and 82 EC changed radically with the enactment of Regulation 1 2003 which in effect dispensed with mandatory prior notifications and allowed national authorities to apply Article 101 3 TFEU directly Given that national legislations perceive certain types of unilateral conduct even if adopted by a non dominant undertaking as a potential source of anticompetitive effects an important question concerns the leeway enjoyed by national authorities under the exception to the convergence rule in Article 3 2 of Regulation 1 2003 and the consequent effect on both legal practice and policy issues In this lucidly argued book focusing on national competition provisions in Germany France Italy and the United Kingdom that deal with such conduct the author provides a detailed examination of how such considerations as the following are affected by Regulation 1 2003 prohibition of abuse of economic dependence or superior bargaining power the particular susceptibility of long term contracts prohibition of resale at a loss or below cost prohibition of boycott unlawful pressures threats and other coercive tactics adopted by undertakings and the role of unfair competition law The analysis follows a functional method of comparative legal analysis reviewing the most relevant norms in the selected jurisdictions particularly in what concerns their goals and function in the context of their respective legal systems Special attention is paid to two specific sectors the motor vehicle and the retailing industries which have most often triggered relevant legislation and case law in the jurisdictions covered Legal scholarship in the field is also drawn upon In its clarification of the meaning of Regulation 1 2003 this book allows practitioners to fully grasp its scope The author's thorough masterful analysis of the statutory framework of Article 3 of the regulation also reveals the variety of reasons why

different Member States have different competition policies on the scope of the exception to the rule of convergence and in this way provides lawyers policymakers and academics with welcome insights on how major EU jurisdictions apply European competition law

Economic Efficiency Ben Van Rompuy, 2012-08-01 Over the past decade we have witnessed an apparent convergence of views among competition agency officials in the European Union and the United States on the appropriate goals of competition law enforcement Antitrust policy it is now suggested should focus on enhancing economic efficiency which we are to believe will promote consumer welfare Recent EU Commission Guidelines on the application of Article 101 TFEU appear to banish considerations that cannot be construed as having an economic efficiency value such as the environment cultural policy employment public health and consumer protection from the application of Article 101 TFEU Arguing that the professed adoption of an exclusive efficiency approach to Article 101 TFEU does not preclude but rather obfuscates the role of non efficiency considerations the author of this timely contribution accomplishes the following objectives traces the genesis of the shift to an efficiency orientation in EU and US antitrust policy and dispels several ingrained misconceptions that underpin it demonstrates the close interrelationship between evolving images of the purpose of antitrust the development of related enforcement norms and enforcement output provides in depth analyses of a number of analytically rich cases in the audiovisual sector and particularly those related to sports rights and explores what the role of non efficiency considerations in the application of Article 101 TFEU could and should be under the modernized enforcement regime

Patent Settlements in the Pharmaceutical Industry under US Antitrust and EU Competition Law Amalia Athanasiadou, 2018-08-14 Reverse payment settlements or pay for delay agreements between originators and generic drug manufacturers create heated debates regarding the balance between competition and intellectual property law These settlements touch upon sensitive issues such as timely generic entry and access to affordable pharmaceuticals and also the need to preserve innovation incentives for originators and to strengthen the pipeline of life saving pharmaceuticals This book is one of the first to critically and comparatively analyse how such patent settlements and various other strategies employed by the pharmaceutical industry are scrutinised by both United States US and European courts and enforcement authorities and to discuss the applicable legal tests and the main criteria used for their assessment The book s ultimate objective is to provide guidance to the pharmaceutical industry regarding the types of patent settlements strategies and conduct which may be problematic from US antitrust and European Union EU competition law perspectives and to assist practitioners in structuring settlements which are both efficient and compliant To this end an exhaustive legal analysis of some of the most controversial issues regarding pharmaceutical patent settlements is provided including the lengthy split among US Circuit Courts on the issue of pay for delay settlements its resolution by the US Supreme Court in *FTC v Actavis* and subsequent jurisprudence the decision of *Lundbeck v Commission* by the European General Court and the *Servier* decision of the European Commission the *Roche Novartis* decision of the European Court of Justice and the most important decisions by

National Competition Authorities on pharma patent settlements in the EU an overview of other types of strategies such as product hopping and product reformulations no authorised generic commitments problematic side deals mechanisms affecting generic substitution the rejection of the scope of the patent test in both the US and the EU and the balancing of patent law and antitrust law considerations in the prevailing applicable tests the benefits of settlements and the main criteria for assessing their legitimacy under US antitrust and EU competition law The analysis provides concrete examples of both illegitimate and legitimate settlements and strategies emphasising on conduct that falls within a grey zone and on the circumstances and criteria under which such conduct could be deemed problematic from an antitrust perspective This book will serve as a valuable guide for pharmaceutical companies wishing to minimise the risk of engaging in conduct that could potentially infringe US antitrust and EU competition law It further aims to save courts and enforcement agencies and also practitioners and academics considerable time and resources by providing an exhaustive analysis of the relevant caselaw with the ultimate goal to increase legal certainty on the most controversial aspects of patent settlements in the pharmaceutical industry

Merger Control Regulation Mihalis Kekelekis, 2006-01-01 Here for the first time is an in depth analysis of the rights of notifying parties and third parties in merger proceedings as reflected in the administrative practice of the Commission and the case law of the Community courts

The Limits of Competition Policy A. E. Rodriguez, Ashok Menon, 2010-01-01 What the authors offer is a thoroughgoing analysis clearly demonstrating that whatever economic path developing countries pursue imposing Western style antitrust regimes will engender uncertainty chill economic behaviour and foster an unhealthy climate for business They employ the influential error cost methodology to appraise the performance of competition policy and to show how such a policy creates irresolvable tensions in fragile economies with weak institutions economies characterized by informal rules of business practice long standing symbiotic business state relationships and unpredictable state action They mount a powerful critique of the arguments of neo institutionalists who fail to recognize the vulnerable nature of emerging market economies and competition advocates who presume to stand ready and vigilant to enforce competition policy on state entities

The FCC and the Politics of Cable TV Regulation, 1952-1980 Michael J. Zarkin, 2010 While other studies have examined the history of cable television regulation none has fully explained why the FCC struggled to develop regulations during its formative years In this study Michael Zarkin helps fill this gap by providing such an explanation through an application of organizational learning theory Zarkin argues that in order for the FCC to formulate regulations for a brand new communications medium it first needed develop and effectively utilize the capacity to gather and

analyze policy relevant knowledge By the 1970s conditions were ripe for this to happen and the FCC was able to more effectively revise its cable television policies This book elaborates and applies an organizational learning framework that contributes to our understanding of how regulatory agencies operate By employing a broad range of published and unpublished primary sources the book also succeeds in providing a more detailed and penetrating study of cable television than previous endeavors Rather than simply summarizing and critiquing policy decisions the book paints a picture of the people ideas and politics that shaped cable television regulation during these formative years The FCC and the Politics of Cable TV Regulation 1952 1980 will be of interest to scholars who study regulatory agencies the policy process and communications law and policy
