Sleep Disorders Sue Wilson, David Nutt, 2013-09-26 Sleep dysfunction is one of the primary symptoms reported by patients with psychiatric disorders, and specifically those suffering from anxiety and depressive disorders. Conversely, primary insomnia and other sleep disorders produce symptoms of mood disturbance that are quite similar to those reported by patients with psychiatric disorders. Because of this overlap in the symptoms and treatments for insomnias and psychiatric disorders, it is important for clinicians to be able to accurately identify the root cause of sleep dysfunction in individual patients in order to optimize treatment. Part of the Oxford Psychiatry Library series, Sleep Disorders provides clinicians with an overview of current understanding of sleep physiology, the pathophysiology of sleep disturbance, and the diagnosis and treatment of sleep disorders. This second edition includes new sections covering sleep problems in children, sleep in the elderly, and sleep in pregnancy and menopause, as well as new algorithms from the British Association of Psychopharmacology's BAP's new Consensus Guidelines on the management of sleep disorders. **Radical Reflections** Mem Fox, 1993 The internationally acclaimed children's book writer and educator offers her insights into the learning process, language education, and the pleasure, growth, and power that reading and writing can bring.
