Matsiliza, 2023-03-01 This book focuses on the knowledge area of higher education governance organisational dynamics leadership and decolonisation We have observed that governance discourse has been excluded in debates that concern the public good The construct of public good seeks to support higher education that does not support a capitalist view of profit making arguably to respond to societal demands and needs such as developmental efforts through academic functions Higher Education

focuses on interconnected multi disciplinary constructs intending to provide services for the public good The issue of public good is an interesting construct that puts universities on the spot since they are expected to be responsive to environmental changes and stakeholder needs through the functioning of accountable governance structures These governance structures are compelled to comply with policy demands within external and internal environmental factors. This experience has exposed universities to systematic challenges that are local regional and global and which forces them to adapt while serving stakeholders and society This book will also interrogate the governance of South African public universities in the post decolonisation era and new demands from stakeholders A Concise Guide to Lecturing in Higher Education and the Academic Professional Apprenticeship Duncan Hindmarch, Lynn Machin, Sandra Murray, Tina Richardson, Helen Walmsley-Smith, 2025-02-28 Ideal for lecturers new to delivering higher education in universities colleges and the private sector It is specifically organised to cover the requirements of the new Academic Professional Apprenticeship both teaching and research specialisms and also supports lecturers undertaking the Post Graduate Certificate in Higher Education The contents are fully mapped to the Higher Education Academy s UK Professional Standards Framework and the VITAE research standards It is designed for both teaching and research lecturer apprenticeship routes and includes clear guidance to help pass the end point assessment There is a focus on the holistic development of the academic professional within the Rankings and the Reshaping of Higher Education Ellen Hazelkorn, 2015-03-23 current context of higher education University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn s first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars The Routledge International Handbook of Higher Education Malcolm Tight, Ka Ho Mok, Jeroen Huisman, Christopher Morphew, 2009-06-03 This volume is a detailed and up to date reference work providing an authoritative overview of the main issues in higher education around the world today Consisting of newly commissioned chapters and impressive journal articles it surveys the state of the discipline and includes the examination and discussion of emerging controversial and cutting edge areas
