rebalances and readdresses the current emphasis in the literature around STEAM as another newer opportunity to teach content. Instead, it brings a more specific focus on an entwining of contemporary theorists putting theory to work to extend the means for understanding and cultivating science and arts creativities and make explicit key connections with the materiality of practices. This new go-to text offers a demonstration of how the latest research and theoretically engaged thinking, thinking through theory on STEAM education, can be put to work in practice.
