

The Titrando in the modern laboratory

Touch Control – a user comfort

The Touch Control is a decidedly ergonomic and modern operating element. You can hold it in your hand, put it on the laboratory bench or use a holder system to attach it to a wall or bench to save the wall. These last two possibilities save space and also protect the Touch Control from chemicals. Up to three Titrando can be controlled by a single Touch Control.

Titration and PC – a harmonious duo

No matter whether you operate the Titrando with the Touch Control and your fingers or with a PC and a mouse – both appearance and operation are practically identical. Methods and determinations are 100% compatible. The master software **Manager** is brilliant and more – it opens up many other possibilities such as database functionality, plotted titration with several instruments and much more.

Data management is knowledge management

The data that your Titrando system produces you can let print out and stored in a conventional manner. However, all advanced data management functions are available. For example storage on a PC/MCU and CompactFlash that is simply inserted in the Touch Control, in the PC/MCU port of the PC or an appropriate card reader. If you work with PC Control or **Manager**, you can use all the storage options offered by the PC world, and on request the Titrando can produce a machine-readable PC/LAN report.

Lab Link

Lab Link opens an internet network to the Titrando and makes it internet-compatible, with all that this implies. In this way, the Titrando can be integrated into GMP methods and determinations can be downloaded from the internet network or stored on them; printers can be used for printing out analysis reports. The Titrando is even accessible from the office by remote control.

Compatibility and traceability

The Titrando System is entirely oriented towards quality management in the laboratory and offers the following possibilities:

- "Auto-diagnostic" test after switching on.
- Monitoring of calibration and service intervals.
- Monitoring of the laboratory data of sensors.
- Monitoring of time and results.
- All changes for the methods are documented.
- Strict control of rights of access using login and password, complying with FDA Regulation 21 CFR Part 11 regarding electronic signatures and electronic records.
