Children of the Dream Rucker C. Johnson, 2019-04-16 An acclaimed economist reveals that school integration efforts in the 1970s and 1980s were overwhelmingly successful and argues that we must renew our commitment to integration for the sake of all Americans We are frequently told that school integration was a social experiment doomed from the start But as Rucker C Johnson demonstrates in *Children of the Dream* it was in fact a spectacular achievement Drawing on longitudinal studies going back to the 1960s he shows that students who attended integrated and well funded schools were more successful in life than those who did not and this held true for children of all races Yet as a society we have given up on integration Since the high point of integration in 1988 we have regressed and segregation again prevails Contending that integrated well funded schools are the primary engine of social mobility *Children of the Dream* offers a radical new take on social policy It is essential reading in our divided times

Cohen, 2023-08-18 School reforms are almost always born out of big dreams and a well meaning desire to change the status quo the American education system as we know it was the product of such a reform But between the lawmakers who spearhead these changes and the students whose education is at stake there are countless teachers principals administrators and local politicians and correspondingly countless ways that things can go sideways In *Reforming the Reform* political scientist Susan Moffitt education scholar Michaela O'Neill and the late policy and education scholar David K Cohen take on a wide ranging examination of the nitty gritty of school reform They focus especially on mezzo level actors but the countless school superintendents principals and teachers figuring out how to apply a new policy in the

unique context of their district or school They conducted more than 250 interviews with mezzo level administrators in Tennessee and California chosen as contrasts for their different political makeup and centralization of the education system between 2016 and 2020 ending their data collection as schools were going virtual at the beginning of the pandemic They also collected survey data from across the US Finally they turned to archival data dating to the earliest American educational reform the creation of a centralized national education policy Taken together this data demonstrates an impressive ambition to identify common problems that arise when a general policy is implemented in a local context The framework provides a general explanation for problems facing social policy reforms in federalist systems including healthcare and offers pathways forward for education policy in particular Tennessee Statistical Abstract ,2000 NAEP 1994 Reading Report Card for the Nation and the States Jay R.
