United States and International Drug Control, 1909-1997 David R. Bewley-Taylor, 2002-04-22 The United States and International Drug Control 1909 1997 charts the US quest to internationalize the doctrine of drug prohibition The study reveals the origins motivation and methodologies as well as the recurring contradictions and inconsistencies present within the US overseas fight against the production manufacture trafficking and use of certain psychoactive substances Drawing on extensive historical materials David Bewley Taylor uses the international career of America s first Drug Czar Harry J Anslinger to explore how the US successfully exploited hegemonic superiority in 1945 to influence the philosophy of the multilateral drug control system operated by the United Nations More than a purely historical study the book employs an interdisciplinary approach to understanding the development perpetuation and consequences of a US driven multilateral drug control system Examining the contemporary UN drug control framework the author argues that international legislation is largely ineffective This provocative book is the first study to provide a picture of US involvement in drug control from its inception to the present day Its wide ranging scope makes it of interest not only to scholars of diplomatic history US foreign Policy and international relations but also to anyone concerned by the universal growth of the illicit drug problem The United States and International Drug Control, 1909-1997 David R. Bewley-Taylor, 1999 This study provides a picture of US involvement with international drug control from its inception to the late 1990s It charts the American quest to internationalize the doctrine of drug prohibition and reveals the origins motivation and methodologies present within the US overseas fight against the production manufacture trafficking and use of certain psychoactive substances **International Drug Control** David R. Bewley-Taylor, 2012-03-22 The first integrated analysis of the causes and effects of diverging views of drug use within the international community Drug Control and International Law Daniel Wisheart, 2018-10-08 This book provides for an extensive legal analysis of the international drug control system in light of the growing challenges and criticism that this system faces In the current debate on global drug policy the central pillars of the international drug control system the UN Drug Conventions as well as its institutions are portrayed as outdated suppressive and seen as an obstacle to necessary changes The book s objective is to provide an in depth and positivist insight into drug control s present legal framework and thus provide for a better understanding of the normative assumptions upon which drug control is currently based This is attained by clarifying the objectives of the international drug control system and the premises by which these objectives are to be achieved The objective of the current global framework of international drug control is the limitation of drugs to medical and scientific purposes The meaning of this objective and its concrete implications for States parties as well as its problems from the perspective of other regimes of international law most notably international human rights law are extensively analysed Additionally the book focuses on how the international drug control system attempts to reach the objective of confining drugs to medical and scientific purposes i e by setting up a universal system that exercises a

rigid control on drug supply The consequences of this heavy focus on the reduction of drug supply are outlined and the book concludes by making suggestions on how the international drug control system could be reformed in the near future in order to better meet the existing challenges The analysis occurs from a general international law perspective It aims to map the international drug control system within a wider context of international law and to understand whether the problems that the international drug control system faces are exemplary for the difficulties that institutionalized systems of global scope face in the twenty first century

*The Political Economy of Narcotics* Julia Buxton, 2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America s strategic interest As a result US policy approaches emerge as a decisive factor in accounting for the failure of prohibition

*Narcotic Culture* Frank Dikötter, Lars Laamann, Zhou Xun, 2004-04-16 To this day the perception persists that China was a civilization defeated by imperialist Britain s most desirable trade commodity opium a drug that turned the Chinese into cadaverous addicts in the iron grip of dependence Britain in an effort to reverse the damage caused by opium addiction launched its own version of the war on drugs which lasted roughly sixty years from 1880 to World War II and the beginning of Chinese communism But as *Narcotic Culture* brilliantly shows the real scandal in Chinese history was not the expansion of the drug trade by Britain in the early nineteenth century but rather the failure of the British to grasp the consequences of prohibition In a stunning historical reversal Frank Dikötter Lars Laamann and Zhou Xun tell this different story of the relationship between opium and the Chinese They reveal that opium actually had few harmful effects on either health or

longevity in fact it was prepared and appreciated in highly complex rituals with inbuilt constraints preventing excessive use. Opium was even used as a medicinal panacea in China before the availability of aspirin and penicillin. But as a result of the British effort to eradicate opium, the Chinese turned from the relatively benign use of that drug to heroin, morphine, cocaine and countless other psychoactive substances. *Narcotic Culture* provides abundant evidence that the transition from a tolerated opium culture to a system of prohibition produced a cure that was far worse than the disease. Delving into a history of drugs and their abuses, *Narcotic Culture* is part revisionist history of imperial and twentieth century Britain and part sobering portrait of the dangers of prohibition.

**We Sell Drugs** Suzanna Reiss, 2014-08-01 This history of US led international drug control provides new perspectives on the economic, ideological and political foundations of a Cold War American empire. US officials assumed the helm of international drug control after World War II at a moment of unprecedented geopolitical influence embodied in the growing economic clout of its pharmaceutical industry. *We Sell Drugs* is a study grounded in the transnational geography and political economy of the coca leaf and coca derived commodities market stretching from Peru and Bolivia into the United States. More than a narrow biography of one famous plant and its equally famous derivative products, Coca Cola and cocaine, this book situates these commodities within the larger landscape of drug production and consumption. Examining efforts to control the circuits through which coca traveled, Suzanna Reiss provides a geographic and legal basis for considering the historical construction of designations of legality and illegality. The book also argues that the legal status of any given drug is largely premised on who grew, manufactured, distributed and consumed it and not on the qualities of the drug itself. Drug control is a powerful tool for ordering international trade, national economies and society's habits and daily lives. In a historical landscape animated by struggles over political economy, national autonomy, hegemony and racial equality, *We Sell Drugs* insists on the socio-historical underpinnings of designations of legality to explore how drug control became a major weapon in asserting control of domestic and international affairs.

Constructing Global Enemies Eva Herschinger, 2010-11-30 *Constructing Global Enemies* asks how and why specific interpretations of international terrorism and drug abuse have become hegemonic at the global level. The book analyses the international discourses on terrorism and drug prohibition and compares efforts to counter both not only from a contemporary but also from a historical perspective. Utilising poststructuralist theory of the relationship between hegemony and identity, Herschinger argues that hegemony is much more than just the dominance of a single country in international life; rather, it is the emergence of a hegemonic order that can best be understood as the production of a new collective identity. Offering an in-depth discussion of the methodology of discourse analysis, the book explores how such hegemonies emerge and persist in the field of security. This serves to explain the widespread disagreement regarding the fight against international terrorism as well as the successful suppression of counter-hegemonic projects in the field of international drug prohibition. *Constructing Global Enemies* will be of interest to students and scholars of international relations and security studies.

What Is Drug Policy For? Julia Buxton, 2025-09-30 The production sale and possession of some drugs is criminalized but why And why despite vast resources and budgets have international efforts to control them so consistently failed Julia Buxton looks at how our current drug control regime came about from the first US driven international meeting on drug control in the early 20th century and the ideologies behind it She also charts the evolution of today s drugs market looking at where drugs are produced and consumed giving voice to those who get caught up in this world Ultimately she asks if the current strategy isn t working what should replace it

**Pot Politics** Mitch Earleywine, 2007 Publisher description Youth Culture and Identity in Northern Thailand Anjalee Cohen, 2020-06-02 Youth Culture and Identity in Northern Thailand examines how young people in urban Chiang Mai construct an identity at the intersection of global capitalism state ideologies and local culture Drawing on over 15 years of ethnographic research the book explores the impact of rapid urbanisation and modernisation on contemporary Thai youth focusing on conspicuous youth subcultures drug use especially methamphetamine use and violent youth gangs Anjalee Cohen shows how young Thai people construct a specific youth identity through consumerism and symbolic boundaries in particular through enduring rural urban distinctions The suggestion is that the formation of subcultures and deviant youth practices such as drug use and violence are not necessarily forms of resistance against the dominant culture nor a pathological response to dramatic social change as typically understood in academic and public discourse Rather Cohen argues that such practices are attempts to fit in and stick out in an anonymous urban environment This volume is relevant to scholars in Thai Studies Southeast Asian Studies Anthropology Sociology Urban Studies and Development Studies particularly those with an interest in youth drugs and gangs

**Regulating Cannabis** Tom Decorte, 2018-04-30 With the legalization of recreational cannabis markets in Uruguay Canada and several U S states a breakthrough in conventional cannabis policy is emerging. But legalization is not a binary choice between prohibition and some regulated commercial model like alcohol. A commercial market is just one of many ways to implement legalization and moving directly from prohibition to commercial legalization leaps from one extreme to the other. Tom Decorte a criminologist and anthropologist at Ghent University Belgium who has published numerous articles on substance use cannabis markets and local drug monitoring systems argues that most of us are bypassing other safer forms of legalization including the nonprofit model. He explores topics such as Why we need to consider regulation of cannabis markets How local authorities and grassroots movements are advocating change How to best design and implement approaches to legalization Join the author as he examines international regulatory controls over cannabis possession use and cultivation as well as a framework for regulating the cannabis market via a nonprofit corporate model that promotes public health and safety over profits.

**The World Heroin Market** Letizia Paoli, Victoria A. Greenfield, Peter Reuter, 2009-04-10 Heroin is universally considered the world's most harmful illegal drug. This is due not only to the damaging effects of the drug itself but also to the spread of AIDS tied to its use. Burgeoning illegal mass consumption in the 1960s and 1970s has given rise to a global market for heroin and other opiates of nearly 16 million users. The production and trafficking of opiates have caused crime, disease, and social distress throughout the world, leading many nations to invest billions of dollars trying to suppress the industry. The failure of their efforts has become a central policy concern. Can the world heroin supply actually be cut, and with what consequences? The result of a five-year long research project involving extensive fieldwork in six Asian countries, Colombia, and Turkey, this book is the first systematic analysis of the contemporary world heroin market, delving into its development and structure, its participants, and its socio-economic impact. It provides a sound and comprehensive empirical base for concluding that there is little opportunity to shrink the global supply of heroin in the long term and explains why production is concentrated in a handful of countries and is likely to remain that way. On the basis of these findings, the authors identify a key set of policy opportunities, largely local, and make suggestions for leveraging them. This book also offers new insights into market conditions in India, Tajikistan, and other countries that have been greatly harmed by the production and trafficking of illegal opiates. A deft integration of economics, sociology, history, and policy analysis, *The World Heroin Market* provides a rigorous and vital look into the complex and resilient global heroin trade.

**Chasing the Scream** Johann Hari, 2015-01-20 The New York Times Bestseller. The Book Behind the Viral TED Talk. For the first time, the startling full story of the disastrous war on drugs, propelled by moving human stories, revolutionary insight into addiction, and fearless international reporting. What if everything you think you know about addiction is wrong? One of Johann Hari's earliest memories is of trying to wake up one of his relatives and not being able to. As he grew older, he realized he had addiction in his family. Confused, unable to know what to do, he set out on a three-year, 30,000-mile journey to discover what really causes addiction and what really solves it. He uncovered a range of remarkable human stories of how the war on drugs began with Billie Holiday, the great jazz singer, being stalked and killed by a racist policeman; of the scientist who discovered the surprising key to addiction; and of the countries that ended their war on drugs with extraordinary results. His discoveries led him to give a TED talk and an animation which have now been viewed more than 25 million times. This is the story of a life-changing journey that showed the world the opposite of addiction is connection.
