Unstoppable Global Warming Every 15yearsupdated And Expanded Edition:

Unstoppable Global Warming Fred Singer,Dennis Avery,2006-09-13 Singer and Avery present in popular language supported by in depth scientific evidence the compelling concept that global temperatures have been rising mostly or entirely because of a natural cycle Using historic data from two millennia of recorded history combined with the natural physical records found in ice cores seabed sediment cave stalagmites and tree rings *Unstoppable Global Warming* argues that the 1 500 year solar driven cycle that has always controlled the earth s climate remains the driving force in the current warming trend Trillions of dollars spent on reducing fossil fuel use would have no effect on today s rising temperatures The public policy key Singer and Avery propose is adaptation not fruitless attempts at prevention Further they offer convincing evidence that civilization s most successful eras have coincided with the cycle s warmest peaks With the added benefit of modern technology humanity can not only survive global climate change but thrive

Unstoppable Global Warming Siegfried Fred Singer,Dennis T. Avery,2007 The author provides scientific evidence that the fifteen hundred year global warming cycle that has always controlled the earth s climate is the primary factor in the current warming trend

Unstoppable Global Warming Siegfried Fred Singer,2008 In this timely book Singer and Avery present what they maintain are the many fallacies associated with the hysterical claims of dangerous climate change and unsubstantiated computer projections surrounding the theory of human caused global warming They make the case for the existence of a solar induced 1 500 year cycle that generates warming and cooling of the Earth s temperature irrespective of the atmospheric concentration of greenhouse gases Singer and Avery argue that natural variations rather than human emitted greenhouse gases have tended to control the climate They provide an exhaustive list of scientific references mostly from refereed journals

Unstoppable global warming : every 1500 years Siegfried Fred Singer,Dennis T. Avery,2008

Discovery of Global Warming (rev. and Expanded Ed.) Spencer R. Weart,2011-06-01 In 2001 an international panel of climate scientists announced that the world was warming at a rate without precedent during at least the last ten millennia and that warming was caused by the buildup of greenhouse gases from human activity The story of how scientists reached that conclusion was the story Weart told in *The Discovery of Global Warming* In this 2008 ed he brings his account up to date revised to reflect the latest science and with a new conclusion that shows how the scientific consensus caught fire among the general world public and how a new understanding of the human meaning of climate change spurred individuals and governments to action A Discover Top Science Book of the Year and a USA Today Best Book of the Year
