

WHIRLPOOL® TOP LOADING WASHING MACHINE

OPERATING INSTRUCTIONS

WARNING

Fire Hazard

Never place items in the washer that are damped with gasoline or other flammable fluids.
No washer can completely remove oil.
Do not dry anything that has ever had any type of oil on it (including cooking oil).
Doing so can result in death, explosion, or fire.

WARNING: To reduce the risk of fire, electric shock, or injury to persons, read the IMPORTANT SAFETY INSTRUCTIONS, located in your appliance's Owner's Manual, before operating the appliance.

STEP 1. ADD THE DETERGENT

Designed to use only HE (High Efficiency) detergents.

NOTE: See **ADDING HE DETERGENT PRODUCTS** (located on page 10) for more information on adding HE detergent, fabric softener, and bleach.

STEP 2. LOAD CLOTHES

For best results, load garments in loose heaps evenly around the basket wall.

STEP 3. PRESS POWER TO TURN ON THE WASHER

STEP 4. ADJUST CYCLE SETTINGS, IF DESIRED

STEP 5. SELECT ADDITIONAL OPTIONS

STEP 6. PRESS AND HOLD START/PAUSE TO BEGIN CYCLE

HOLD TO Start

NOTE: Start button must be held for 3 seconds to start cycle. Once the status lights are illuminated, release the start button.

*End of cycles, settings or options are available with all models.

ADDING LAUNDRY PRODUCTS

IMPORTANT: Do not overfill. Do not add laundry products that will result in longer cycle times and reduced cleaning performance. It may also result in component malfunction and, over time, buildup of mold or mildew. HE detergents should be low-sudsing and spin-drying to produce the right amount of suds for the best performance.

ADDING HE DETERGENT TO BASKET

Add a measured amount of detergent or single-dose laundry pods into the basket. If using one type of detergent, color-safe bleach, or fabric softener, measure each into the basket and the washer basket before adding clothes.

NOTE:

Follow the manufacturer's instructions to determine the amount of laundry products to use.

ADDING LIQUID CHLORINE BLEACH

Do not overfill, dilute, or use more than 1 cup (236 mL) of bleach per cycle with liquid chlorine bleach.

ADDING LIQUID FABRIC SOFTENER

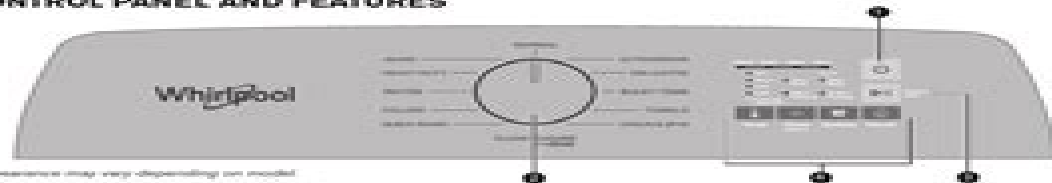

Do not overfill. Follow the manufacturer's instructions to determine the amount of fabric softener to use. Follow the manufacturer's instructions for correct amount of fabric softener based on your load size. Then use the Rinse/Options button to select Fabric Softener. The Dosing Ball® dispenser will automatically release the fabric softener at the correct time in the cycle. The instructions on using the Dosing Ball® dispenser are on the inside of the lid.

ADDING LIQUID FABRIC SOFTENER MANUALLY

During the final rinse, use the Start/Pause button to pause the cycle. During the final rinse, wait until the water has completely drained, press the Start/Pause button to pause the washer. Lift the lid and add the correct amount of liquid fabric softener. Close the lid and hold the Start/Pause button to resume the cycle.

CONTROL PANEL AND FEATURES

*Appearance may vary depending on model.

1 POWER

Press to turn on/off or to stop/start a cycle.

2 CYCLE KNOB

Turn knob to select desired cycle.

3 START/PAUSE

Press and hold the Start/Pause button for 3 seconds until all status lights are illuminated, then release to start cycle. Press during a cycle to pause cycle and unlock lid.

NOTE: If machine is spinning, it may take longer to unlock lid.

4 CYCLE MODIFIERS

Press to modify the cycle's available temperatures (Tap/Cold, Cold, Cool, Warm, or Hot).

NOTE: Pressing Temp will toggle through available temperature choices. When no lights in the temperature column are illuminated the selected temperature is Tap/Cold.

RINSE OPTIONS

Press to modify the cycle's available rinse options. Press once for Fabric Softener, twice for Extra Rinse and three times to activate both.

FABRIC SOFTENER

Select this option to tell the machine when you have added liquid fabric softener.

EXTRA RINSE

Select this option to add a second rinse.

CHOOSING THE RIGHT CYCLE

A cycle guide for your washer can be found online at www.whirlpool.com. This document will help identify which cycle to choose for various load types as well as the default cycle options. For example we recommend using the NORMAL cycle with Warm water for cottons, linens, and mixed-garment loads.

MORE WATER WHEN YOU WANT IT

AUTO SENSING AND DEEP WATER

- The washer will adjust the water level to the optimal amount for a High-Efficiency wash of the detected load size.
- Press Deep Water to automatically add more water to your wash cycle.
- It is recommended to use BULKY ITEMS cycle with Deep Water option for loads where maximum water level is desired.
- Expect longer cycle times due to extended fill duration when using the Deep Water option.

PRE-TREATING BEFORE A WASH CYCLE

- Press the Pre-treat button once to turn on and press again to turn off.
- Pre-treat will automatically shut off after 30 minutes if water level is reached.
- Water will automatically drain if you leave the lid open. Water will also drain after 30 minutes if the lid is left closed.

CLEANING WITH LESS WATER

The washer has been designed and optimized to provide a thorough cleaning using less water to conserve energy and resources.
As the washer designs and moves the load, the level of the items will settle in the basket. This is normal, and does not indicate that more items should be added.
IMPORTANT: You will not see a full basket of water as with other, less efficient washing machines. It is normal for some of the load to be above the water line.

For detailed installation instruction and maintenance information, writer storage, and transportation tips, please see the Owner's Manual included with your machine.
