ADDING LAUNDRY PRODUCTS

IMPORTANT: Do not overfill. Do not overfill with laundry products and reduced rinsing performance. It may also result in component malfunction and, over time, buildup of mold or mildew. HE detergents should be low-sudsing and spin-drying to produce the right amount of suds for the best performance.

ADDING THE DETERGENT TO BASKET

Add a measured amount of detergent or single-dose laundry pods into the basket. If using one type of detergent, color-safe bleach, or fabric softener, measure each into the basket before adding the washer basket before adding clothes.

NOTE: Follow the manufacturer's instructions to determine the amount of laundry products to use.

ADDING LIQUID CHLORINE BLEACH

Do not overfill, dilute, or use more than 1 cup (236 mL) Do not use color-safe bleach or gel-based bleach in this cycle with liquid chlorine bleach.

NOTE: If the washer detects an out-of-balance condition it may pause and attempt and re-balance. During this time the Pause and Wash status indicators will both briefly illuminate.

WARNING: Do not wash water-resistant or water-repellent-type clothing. Failure to properly follow these instructions may result in an abnormal staining and out-of-balance condition that could result in physical injury, property damage, and/or appliance damage.

CHOOSING THE RIGHT CYCLE

A cycle guide for your washer can be found online at www.whirlpool.com. This document will help identify which cycle to choose for various load types as well as the default cycle options. For example we recommend using the NORMAL cycle with Warm water for cottons, linens, and mixed-garment loads.

PRE-TREATING BEFORE A WASH CYCLE

- Press the Paused button once to turn on and press again to turn off.
- Press will automatically shut off after 30 minutes if water level is reached.
- Water will automatically drain if you leave the lid open. If the lid is left closed, 3 hours if the lid is left closed.

MORE WATER WHEN YOU WANT IT

AUTO SENSING AND DEEP WATER

- The washer will adjust the water level to the optimal amount for a High-Efficiency wash of the detected load size.
- Press Deep Water to automatically add more water to your wash cycle.
- It is recommended to use BULKY ITEMS cycle with Deep Water option for loads where maximum water level is desired.
- Expect longer cycle times due to extended fill duration when using the Deep Water option.

CLEANING WITH LESS WATER

The washer has been designed and optimized to provide a thorough cleaning using less water to conserve energy and resources.
As the washer designs and moves the load, the level of the items will settle in the basket. This is normal, and does not indicate that more items should be added.
IMPORTANT: You will not see a full basket of water as with other, less efficient washing machines. It is normal for some of the load to be above the water line.
