From Gutenberg to the Global Information Infrastructure Christine L. Borgman, 2003-01-24 Will the emerging global information infrastructure GII create a revolution in communication equivalent to that wrought by Gutenberg or will the result be simply the evolutionary adaptation of existing behavior and institutions to new media Will the GII improve access to information for all Will it replace libraries and publishers How can computers and information systems be made easier to use What are the trade offs between tailoring information systems to user communities and standardizing them to interconnect with systems designed for other communities cultures and languages This book takes a close look at these and other questions of technology behavior and policy surrounding the GII Topics covered include the design and use of digital libraries behavioral and institutional aspects of electronic publishing the evolving role of libraries the life cycle of creating using and seeking information and the adoption and adaptation of information technologies The book takes a human centered perspective focusing on how well the GII fits into the daily lives of the people it is supposed to benefit Taking a unique holistic approach to information access the book draws on research and practice in computer science communications library and information science information policy business economics law political science sociology history education and archival and museum studies It explores both domestic and international issues The author's own empirical research is complemented by extensive literature reviews and analyses

The American Catalog, 1881 Driving Europe Frank Schipper, 2008 Today we can hardly imagine life in Europe without roads and the automobiles that move people and goods around In fact the vast majority of movement in Europe takes place on the road Travelers use the car to explore parts of the continent on their holidays and goods travel large distances to reach consumers Indeed the twentieth century has deservedly been characterized as the century of the car The situation looked very different around 1900 People crossing national borders by car encountered multiple hurdles on their way Technically they imported their vehicle into a neighboring country and had to pay astronomic

import duties Often they needed to pass a driving test in each country they visited Early on automobile and touring clubs sought to make life easier for traveling motorists International negotiations tackled the problems arising from differing regulations The resulting volume describes everything from the standardized traffic signs that saved human lives on the road to the Europabus taking tourists from Stockholm to Rome in the 1950s Driving Europe offers a highly original portrait of a Europe built on roads in the course of the twentieth century
