A Scientific Approach to Writing for Engineers and Scientists Robert E. Berger, 2014-05-23 A SCIENTIFIC APPROACH TO WRITING Technical ideas may be solid or even groundbreaking but if these ideas cannot be clearly communicated reviewers of technical documents e g proposals for research funding articles submitted to scientific journals and business plans to commercialize technology are likely to reject the argument for advancing these ideas The problem is that many engineers and scientists entirely comfortable with the logic and principles of mathematics and science treat writing as if it possesses none of these attributes The absence of a systematic framework for writing often results in sentences that are difficult to follow or arguments that leave reviewers scratching their heads This book fixes that problem by presenting a scientific approach to writing that mirrors the sensibilities of scientists and engineers an approach based on

an easily discernable set of principles Rather than merely stating rules for English grammar and composition this book explains the reasons behind these rules and shows that good reasons can guide every writing decision This resource is also well suited for the growing number of scientists and engineers in the U S and elsewhere who speak English as a second language as well as for anyone else who just wants to be understood **Citizenship and Advocacy in Technical**

Busting the Myth of the Communication Metaphor Sarah Read,2025-07-01 Traces the linguistic rhetorical historical cultural and economic origins of our most basic beliefs and practices for successful technical writing to initiate a reckoning about who they serve and who they harm *Busting the Myth of the Communication Metaphor* is a transdisciplinary approach to making visible and explaining the multiple origins of why our most basic beliefs about what makes scientific and technical writing successful are wrong ineffective and harmful These tacitly held beliefs and practices collectively called the Communication Metaphor stand in as symbolic for a messier more reality based understanding of how writing and communication works By starting from conventional statements made by scientists technical professionals and standard textbooks that successful technical writing is short and to the point with the facts only no opinions the book traces the histories and structures of the multiple elements of the Communication Metaphor The text synthesizes survey results multiple strands of scholarship personal experience and original illustrations into a powerful argument for imagining a more just approach to scientific and technical writing *Technical Communication* Conference on College Composition and Communication (U.S.).
