Technical Communication John Lannon 5th Edition:

Rhetorical Memory and Delivery John Frederick Reynolds, 2013-11-05 Why has classical rhetoric been a subject of such growing interest for the past ten years? Because the most exciting work in classical rhetoric has asked us to rethink classical concepts in modern terms. What's been missing at least in book-length form is a scholarly rethinking of rhetorical memory and delivery. As many scholars have been noting in their work for some time now, three of five classical issues—*invention*, *arrangement*, and *style*—have dominated rhetorical studies, while the other two, *memory* and *delivery*, have largely been misunderstood or ignored. Re-examined in light of recent research on orality, literacy, and electronic technology, rhetorical memory and delivery issues can become not only central to the field but also key to the continued interest in classical rhetoric. Bringing together national scholars from a variety of related disciplines in which rhetorical memory and delivery issues matter, this collection is the only volume that examines classical and contemporary interpretations of rhetorical memory and delivery in depth and detail.

Design Discourse David Franke, Alex Reid, 2010-10-06 *Design Discourse: Composing and Revising Programs in Professional and Technical Writing* addresses the complexities of developing professional and technical writing programs. The essays in the collection offer reflections on efforts to bridge two cultures, what the editors characterize as the art and science of writing, often by addressing explicitly the tensions between them. *Design Discourse* offers insights into the high-stakes decisions made by program designers as they seek to function at the intersection of the practical and the abstract, the human and the technical.

Composition Theory for the Postmodern Classroom Gary A. Olson, Sidney I. Dobrin, 1994-05-24 *Composition Theory for the Postmodern Classroom* is a collection of the most outstanding articles published in the *Journal of Advanced Composition* over the last decade. Together, these essays represent the breadth and strength of composition scholarship that has fruitfully engaged with critical theory in its many manifestations. In drawing on the critical discourses of philosophers, feminists, literary theorists, African Americanists, cultural theorists, and others, these compositionists have enriched the discourse in the field, broadened intellectual conceptions of the multiple roles and functions of discourse, and opened up an infinite number of questions and new possibilities for composition theory and pedagogy.

Basic Technical Writing Herman M. Weisman, 1992 Using easy-to-follow explanations and a wealth of writing samples taken from real life, this classic introduction to basic technical writing covers the formal technical report and shorter forms such as letters, memos, and abstracts, and explains all expository techniques in detail: e.g., definition, description, explaining a process, analysis. It explores every aspect of the technical writer's craft, from the process that begins before pen touches paper (e.g., topic research, literature search, and the scientific method) to the writing, revising, and editing that results in a final product. Major sections include: modality and media, technical English, technical style, and automated word processing; technical writing fundamentals; expository forms; technical report writing; research writing; editing; graphics; short technical writing forms; proposals; oral reports; technical papers and articles; and grammar, punctuation, style usage.

Cross-cultural Communication Thomas Warren,2017-03-02 Cross Cultural Communication is a collection of essays that examines how practitioners can improve the acceptance of their documentation when communicating to cultures other than their own The essays begin by examining the cross cultural issues relating to quality in documentation From there the essays look at examples of common documents analysing them from several perspectives Specifically the author uses communication theories such as Bernstein s Elaborated and Restricted Code theory and Marwell and Schmidt s Compliance Gaining theory to show how documents used by readers who are not native speakers of English can be written and organized to increase their effectiveness The principal assumption about how practitioners create their documents is that while large organizations can afford to write translate and then localize small to medium size organizations produce many documents that are used directly by people in other cultures often without translating and localizing The advantage the writer gains from these essays is in understanding the strategies and knowing the kinds of strategies to apply in specific situations In addition the essays can serve as a valuable resource for students and teachers alike as they determine ways to understand how cross cultural communication is different and why it makes a difference Not only do students need to be aware of the various strategies they may apply when creating documents for cross cultural settings they also need to see how research can apply theories from different areas in the case of these essays communication and rhetorical theories Another value of the essays is to show the students the role standards play in cross cultural communication standards are written by committees that follow style rules developed by the International Standardization Organization in Geneva Thus both students and practitioners can find valuable cross cultural communication advice in these essays *Professional and Technical Writing Strategies* Judith S. VanAlstyne,Merrill D.
