Principles of Sustainable Urban Development in the Bidding Process for Olympic Games Gregor

Wiltshko, 2010-01-11 Inhaltsangabe Introduction The more you know about the Olympics the less it is about sport Bob Perry Design director of Olympic Projects at Scott Carver Pty Ltd <http://www.infolink.com.au> The Olympic Games as a mega sports event attracts millions of people from all over the world New records fascinating performances scandals or gigantic celebrations are just some of the attractions provided by this event One attraction for urban planners is the fact that the Games imply opportunities to promote urban development From an urban planning perspective the Olympic Summer Games in Barcelona 1992 set a new standard in defining success of an event of this scale The city used the Games to promote urban development and planning strategies profiting from the event in a long term perspective Furthermore the city took another opportunity to find again a place on the global map through the Olympic Games The case of Barcelona is one of the mostly cited successful urban development initiatives connected with a mega sports event Olympic Cities have taken the opportunity to promote urban development with the event very differently in the history of the Olympics The International Olympic Committee IOC as the event owner sets some requirements giving only a few cities the right to stage the event These requirements are checked in the bidding process ending with the decision which city succeeds in getting the right of staging the event Integrating the success of an Olympic City in terms of urban development and in terms of the bidding process the main question from an urban planning perspective is What is the relevance of Urban Development in the Bidding Process for Olympic Games To answer the definition of the city's success in terms of urban development and the Olympic Games bidding process it is helpful to investigate the role of Olympic Infrastructure with a view towards urban sustainability As such it is believed that respecting specific planning principles in the bidding process can help to 1 ensure sustainable urban development and 2 enhance the quality of the bid The first aspect is relevant for the success of the city in terms of urban development to benefit from the Games in a long time perspective The second aspect is relevant for the city's success in the bidding process to acquire the right for staging the Games The aim of this thesis is to examine how the quality of the bid may respond to principles

Urban Transformations through Exceptional Architecture Nadia Alaily-Mattar, Alain Thierstein, 2021-05-30 Urban Transformations through Exceptional Architecture focusses on the nexus between architecturally exceptional projects and the city It addresses the following questions How can the complexity of these projects be comprehended What roles do the political contexts play in the commissioning of such projects and what audiences do these projects serve How has the granting of professional recognition for architects changed and what will this change mean to measures of exceptionality in architectural design What roles do the architectural

competitions play in the process of commissioning the design of architecturally exceptional projects and do design competitions as an urban planning tool grant high value designs Architecturally exceptional projects are situated in physical urban fabrics How can this situatedness be analysed and what different values does the urban design dimension of these projects add By considering diverse aspects of architecturally exceptional projects the chapters in this book utilise a variety of research methods They bring into dialogue a range of themes regarding the architectural urban design and political aspects of these projects This volume illustrates that multidisciplinary might well be the best strategy to balance the risks of over simplification and the challenges of complexity in analysing these exceptional projects and the city in its ever transformative process The chapters in this book were originally published as a special issue of the Journal of Urban Design
