## Real Fix - P0087, P0093, Replaced Fuel Filter

Fixed !!! 11

## Complaint

The customer states the check engine light is on.

## Cause

Connected a scan tool and found codes: P0087 - Fuel Rail/System Pressure - Too Low and P0093 - Fuel System Leak Detected - Large Leak. Used the scan tool to monitor the fuel rail pressure at idle and at 1,500 RPM and found the fuel pressure values were below specifications. Inspected the fuel system for signs of leaks or porous hoses and found no faults. Connected a fuel pressure gauge to the fuel rail, started the engine, and found the measured pressure was below specifications. Removed the fuel filter for visual inspection and found the filter was restricted with debris.

## Correction

Replaced the fuel filter, cleared codes, performed a road test, and verified the vehicle operated properly. The check engine light did not illuminate and no fault codes returned.
