Transhumanism: The Proper Guide to a Posthuman Condition or a Dangerous Idea? Wolfgang Hofkirchner, Hans-Jörg Kreowski, 2020-12-12 This book examines the contributions of the transhumanism approach to technology in particular the contributed chapters are wary of the implications of this popular idea The volume is organized into four parts concerning philosophical military technological and sociological aspects of transhumanism but the reader is free to choose various reading patterns Topics discussed include gene editing the singularity ethical machines metaphors in AI mind uploading and the philosophy of art and some perspectives taken or discussed examine transhumanism within the context of the philosophy of technology transhumanism as a derailed anthropology and critical sociological aspects that consider transhumanism in the context of topical concerns such as whiteness maleness and masculinity The book will be of value to researchers engaged with artificial intelligence and the ethical societal and philosophical impacts of science and technology

Data Structures For Particle Physics Experiments: Evolution Or Revolution? - Proceedings Of The 14th Workshop On The Infn Eloisatron Project Rene Brun, Paolo Palazzi, 1991-11-12 HEP data structure systems such as ADAMO BOS CHEETAH JAZELLE ZEBRA etc are not static but continue to evolve some slowly others more quickly Large systems have been built on them and by a careful comparison of their usage in experiments one should be able to better understand which way to go It is crucial to preserve the current investment while exploiting new computing technology Experiments at large colliders are taking data and doing physics or about to do so so one can now compare practical experiences with different data management solutions in the area of Simulation of Interactions and their Detection Data Acquisition On Line Management Description of Detector and other Equipment Experiment and Data Processing Bookkeeping Reconstruction Algorithms Event Display and Statistical Data Analysis The articles in these proceedings are by contributors who are active in developing computer systems for Experimental Particle Physics where the organisation of the data plays an important role as well as those who are building systems and packages to make this work easier

Computational Power Massimo Durante, 2021-03-11 We delegate more and more decisions and tasks to artificial agents machine learning mechanisms and algorithmic procedures or in other words

to computational systems Not that we are driven by powerful ambitions of colonizing the Moon replacing humans with legions of androids creating sci fi scenarios la Matrix or masterminding some sort of Person of Interest like Machine No the current digital revolution based on computational power is chiefly an everyday revolution It is therefore that much more profound unnoticed and widespread for it affects our customary habits and routines and alters the very texture of our day to day lives This opens a precise line of inquiry which constitutes the basic thesis of the present text our computational power is exercised by trying to adapt not just the world but also our representation of reality to how computationally based ICTs work The impact of this technology is such that it does not leave things as they are it changes the nature of agents habits objects and institutions and hence it subverts the existing order without necessarily generating a new one I argue that this power is often not distributed in an egalitarian manner but on the contrary is likely to result in concentrations of wealth in dominant positions or in unjust competitive advantages This opens up a struggle with respect to which the task of reaffirming the fundamental values the guiding principles the priorities and the rules of the game which can transform or attempt to transform a fierce confrontation between enemies in a fair competition between opponents rests on us
