North American X-15 Peter E. Davies, 2017-05-18 The revolutionary X-15 remains the fastest manned aircraft ever to fly. Built in the two decades following World War II, it was the most successful of the high-speed X-planes. The only recently broken sound barrier was smashed completely by the X-15, which could hit Mach 6.7 and soar to altitudes above 350,000ft beyond the edge of space. Several pilots qualified as astronauts by flying above 50 miles altitude in the X-15, including Neil Armstrong, the first man on the Moon. The three X-15s made 199 flights, testing new technologies and techniques which greatly eased America's entry into manned space travel and made the Apollo missions and Space Shuttle viable propositions. With historical photographs and stunning digital artwork, this is the story of arguably the greatest of the X-Planes.

Fighting Cockpits Donald Nijboer, 2023-08-17 What was it like to sit in the pilot's seat and take control of a P-51 Mustang in World War II? What about an F-14 Tomcat at the height of the Cold War? Or a Lockheed Martin F-22 Raptor today? The cockpits of these fighter and bomber aircraft are revealed in *Fighting Cockpits*. Showcasing more than 50 of the world's most famous combat cockpits from early World War I aircraft to present-day fighters, this book includes more than 200 rich color photos from photographer Dan Patterson as well as detailed history about combat cockpit development from aviation expert and historian Donald Nijboer. Presented in large format, you'll be blown away by studio-shot spreads of views from the cockpits, vintage photographs of the aircrafts in action, and modern photography of surviving crafts. This book will complete any history buff or aviation enthusiast's library.
