Entrepreneurship and Innovation in Evolving Economies Megan M. Carpenter, 2012-01-01 The very foundation of the economy is changing Across the United States primary and secondary

sector industries are no longer as viable as they once were because the particular businesses are no longer profitable because the underlying resources are no longer as plentiful or desirable or because human activity is not essential to various aspects of an industry's operations. As economies evolve from traditional industrial resources such as mining and manufacturing to new resources such as information and content, innovation and entrepreneurship are key. *Entrepreneurship and Innovation in Evolving Economies* examines the role of law in supporting innovation and entrepreneurship in communities whose economies are in transition. It contains a collection of works from different perspectives and tackles tough questions regarding policy and practice, including how support for entrepreneurship can be translated into policy. Additionally, this collection addresses more concrete questions of practical efficacy, including measures of how successful or unsuccessful legal efforts to incentivize entrepreneurship may be through intellectual property law and otherwise, and what might define success to begin with. Expertly researched and widely accessible, *Entrepreneurship and Innovation in Evolving Economies* will appeal especially to students and scholars of innovation law and entrepreneurship.
