Kellerhals, R. Zogg, 1999-08-18 Tinnitus cannot be cured by drug treatment or other means of modern medicine It has to be considered a handicap which necessitates rehabilitation This new approach has proven surprisingly successful and provides relief even for desperate tinnitus sufferers Waiving seemingly easy but futile attempts to cure tinnitus by passive therapies patients have to decide on a long and demanding active rehabilitation process but their efforts will be rewarded Tinnitus is considered as an abnormal activity somewhere within the hearing system but mainly it is a faulty programme in the software of the brain Based on scientific evidence the authors present a modern tinnitus rehabilitation programme with the aim to prevent the conscious preception of tinnitus It centers on the rules of Tinnitus Retraining Therapy but includes supplementary holistic measures on biological psychological and social levels matching the modern principles of psychosomatic medicine Providing concise and easily comprehensible guidelines for efficient help the manual is highly recommended for tinnitus sufferers as well as GPs and ENT specialists audiologists hearing aid acousticians psychotherapists and other health care professionals involved in caring for tinnitus patients Contains important addresses of tinnitus retraining therapy and self help groups *Tinnitus - How I Deal with It* Ronald Nutter, 2014-09-27 This book is the result of my learning that I have Tinnitus what it is and my options for dealing with the problem I have suffered with Tinnitus for over 35 years I had been checked by several doctors over the years and was told that either they couldn't find a problem or there was nothing that could be done I learned how to deal with it I have never been one to complain about the hand I have been dealt I recently saw a commercial on TV that told me there were things that now could be done What you see in this eBook is the results of my research and experiences While I was doing my research I found that there isn't a cure at least at this point in time I was open to considering the use of pharmaceutical solution to help in the treatment process but learned that as of 2013 there wasn't a FDA approved drug available In the past

the only thing that hearing aids were able to do was give some amplification which can help in some cases of Tinnitus but may not be able to help in all situations The solution I found has been available for about a year and half at this point It does this by masking the sound of Tinnitus you are hearing With technology being in a constant state of evolvement things will only get better Maybe someday there will be a cure for Tinnitus for today we can at least treat the symptom These are just my experiences The results you experience may be different from mine It is my hope that in reading my book is that it will save you some of the research that I have had to go through For more information please visit <https://www.amazon.com/author/ronaldnutter>
