

The Wonder of the Titanic

The Titanic was a British luxury passenger liner. It was built by a famous, world shipbuilding company called White Star Line based in Belfast, Ireland. The ship was built to be the largest and fastest ship in the world. It was designed for luxury travel. Known as the Millionaire's Steamship, the Titanic's passengers were rich and famous. Unfortunately, the ship became famous for all the wrong reasons. It sank during its maiden voyage to New York City on April 15, 1912.

The Titanic was an amazing ship. It was part of a new class of ships designed to be the largest steamships of all time. The Titanic was 882.5 feet long and 91.3 feet wide. There were over 600 staterooms ranging from first to third-class accommodations. There were ornate decorations, including a grand staircase serving as a club, a first-class dining saloon, four theaters, and a luxurious heated swimming pool. There were also harbor shops, a library, and a sports court. A one-way first-class ticket on board the Titanic would have cost \$4,000, the equivalent of \$100,000 today.

The sinking of the Titanic is an epic, extraordinary story for what happened when humans made the mistake of being overly proud and confident. The ship was spotted, with focused attention on all of the first-class passengers.

It is estimated only 20 lifelines, enough to save 1,178 people. The total number of passengers and crew on the Titanic was 2,201.

Throughout the evening of April 14, the Titanic started to receive wireless radio warnings about reports of ice from other ships. The captain of the ship, Edward Smith, changed course and headed

Academic Language In Second Language Learning Christian J. Faltis, M. Beatriz Arias, 2013-03-01

Language in academic settings also referred to as academic language has gained attention in the field of second language learning owing to new understandings of the complexities of language inherent in learning academic content and new efforts to assess English learners' language proficiency in the context of school learning. The concept of academic language as distinct from social language has been in the academic literature since the mid 1950s and surfaced as a major construct in the field of bilingual education in the 1980s. Many readers will be familiar with the ideas of BICS and CALP first introduced by Jim Cummins in the 1980s. This book presents a critique of academic language as a separable construct from social language and introduces current research efforts to understand how English learners interact, interpret, and show understanding of language in academic contexts in ways that re-think and go beyond the distinction between social and academic language. The book is organized into three main sections, each with a range of chapters that consider how academic language plays into how children and youth learn academic content as emergent bilingual students in school settings. A Foreword and Afterword offer commentary on the book and its contents. The intended audience for this book is graduate students, teacher educators, and researchers interested in issues of language and content learning for English learners, the new mainstream of schools across the nation. There is something for a wide range of readers and students of second language acquisition in this volume.

The Rescue of the Third Class on the Titanic David Gleicher, 2017-10-18. This work seeks to understand why a disproportionately large number of third class passengers, particularly women and children, died during the sinking of the Titanic in relation to the first and second classes. It examines the gender, class, social, and cultural factors that influenced this disparity. It aims to uncover both why and how five hundred and thirty-one third class passengers died on the night of April 14th, 1912. A key area of focus is the difficult relationship between the ship's authorities and the men of the third class and the extent to which this determined the fate of passengers during the rescue efforts. The introduction asks: Who were the third class passengers and uses ethnic and economic backgrounds to suggest the third class belonged to the Old Immigration wave of migrants rather than the contemporary New Immigration of the first and second. The first chapter concerns the exclusion of third class narratives in the popular story of the Titanic. Chapters two through seven determine the whereabouts of the third class during every stage of evacuation and flag the discrepancies in testimonies from both the British and American inquiries. Chapter eight provides a conclusion which claims the popular story includes a great many falsehoods with regard to the third class, including their treatment by crew, their behaviours, and their survival rates. The first

appendix tables nationalities into regions the second outlines the twenty routes to the lifeboats as testified by one of the Titanic design architects and the third provides deck plans for every level of the ship
