Современные методы управления, реализации и применения Алексей Колганов,Сергей Лебедев,Николай Гнездов,2019-09-03 DSP Developing Embedded Software using DaVinci and OMAP Technology B.I. Pawate,2022-05-31

This book discusses how to develop embedded products using DaVinci OMAP Technology from Texas Instruments Incorporated It presents a single software platform for diverse hardware platforms DaVinci OMAP Technology refers to the family of processors development tools software products and support While DaVinci Technology is driven by the needs of consumer video products such as IP network cameras networked projectors digital signage and portable media players OMAP Technology is driven by the needs of wireless products such as smart phones Texas Instruments offers a wide variety

of processing devices to meet our users price and performance needs These vary from single digital signal processing devices to complex system on chip SoC devices with multiple processors and peripherals As a software developer you question Do I need to become an expert in signal processing and learn the details of these complex devices before I can use them in my application As a senior executive you wonder How can I reduce my engineering development cost How can I move from one processor to another from Texas Instruments without incurring a significant development cost This book addresses these questions with sample code and gives an insight into the software architecture and associated component software products that make up this software platform As an example we show how we develop an IP network camera Using this software platform you can choose to focus on the application and quickly create a product without having to learn the details of the underlying hardware or signal processing algorithms Alternatively you can choose to differentiate at both the application as well as the signal processing layer by developing and adding your algorithms using the xDAIS for Digital Media xDM guidelines for component software Finally you may use one code base across different hardware platforms
