Camara, Alem Hailu, 2024-02-27 Historically Black Colleges and Universities were established to provide the opportunity for higher education to people of African descent in the era of segregation The visions values and heritages these schools embodied enabled them to chart new frontiers of learning scholarship and public engagement for and beyond the United States Historically Black Colleges and Universities in a Globalizing World The Past the Present and the Future edited by Alem Hailu Mohamed S Camara and Sabella O Abidde examines the history and contribution of these institutions in the broader national and global sociopolitical context of the changes taking place in the nation and the world Collectively the contributors offer reflections and visions by both looking back and forward to find viable answers to the challenges and opportunities HBCUs face in the new century and beyond They argue that as the world convulses by the new global dynamics of emerging pandemics economic dislocations and resource constraints HBCUs are uniquely positioned to meet these challenges      *Culture, philosophies and reforms in public administration for the globalizing world* Edwin O.C. Ijeoma, Ogochukwu I. Nzewi, 2018-12-31 The aim of this scholarly collected work is to contribute to the scientific discourse on public administration in a globalised environment The book reflects on governance challenges in South Africa and in Africa with its point of departure being the master narratives the so called grand debates such as New Public Management and specifically the role of technology It also reflects on the so called middle range discourses concerning organisational level issues in government e g leadership and work procedures and explores new solutions to old governance challenges like corruption and service delivery The uniqueness of this collected work lies in its ability to reflect on existing philosophies and practices in an innovative way Through its multidisciplinary lens the book opens up a new vision for the future of public administration in the South African context and on the African continent not neglecting the current local regional and global environment Until recently globalisation was considered an entrenched world order but international political events during the course of the past few years have resulted in one of the biggest challenges to its endurance in recent history This includes developments such as the successful referendum in Britain to exit the European Union highlighting the growth of a severe nationalist and protectionist agenda that may be a signal of the unravelling of the current globalism world order

These developments inspire deeper interrogation of the challenges to effective public administration globally and the ripple effects in South Africa and Africa as a whole. Pointedly it is evident that ensuring the voice of citizens in policy decision making remains a critical governance challenge. On the policy front there are perennial challenges of land reform, service delivery and poverty, while on the governance front corruption has metastasised with a growing culture of impunity and lack of accountability in leadership. In the midst of growing corruption and more than 20 years into democracy, South Africa's income inequality remains one of the highest in the world. This setting constitutes the context of the research outcome published in this scholarly work.

**Transforming Higher Education in Asia and Africa** Fred M. Hayward, 2020-03-01. Drawing on over fifty years of on-the-ground experience, Fred M. Hayward's *Transforming Higher Education in Asia and Africa* analyzes change processes in higher education in eight Asian and African countries. The twelve cases range from the push to upgrade and transform higher education in Afghanistan in the midst of a war to the successful struggle against apartheid in South African institutions, as well as thwarted efforts in Sierra Leone and Madagascar. Providing both practical lessons learned and hope for communities globally, Hayward demonstrates that higher education change and even transformation, which is more fundamental and structural, can occur even in the most difficult environments. Successful transformation requires well-crafted strategic and budget plans with careful implementation, monitoring and effective leadership at multiple levels. Yet also critical are a commitment to human development, a desire for freedom and belief in democracy, and recognition that high quality higher education is essential to national development.

*Anchored in Place* Bank, Leslie, Cloete, Nico, 2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges
