What you really need to focus on when trying to lose weight is making small healthy changes that remain with you forever Educate yourself on what s good for you what s bad for you what you should consume more of and what you should consume less of and start incorporating these into your daily life It might be hard at first but you can do it Even if you only change one small habit a week by adding something that s good for you and eliminating something that s bad for you Even if it takes you twelve months to get yourself into a healthy life long eating plan at least in 12 months you will be there Remember the one thing that we have no control over is time It is the one variable that can never be controlled 12 months from reading this article is going to be 12 months from reading this article no matter which way you look at it You cannot change that However what you are doing and where you will be when that 12 month mark arrives is the variable that can be controlled What you do within that 12 months is controlled entirely by you You can either be in the same situation or you can slowly chip away at what can appear to be an impossible task so that by the time the inevitable arrives you are in a completely different situation The choice is yours and its time to take control Regardless of your current situation when it comes to healthy eating it s never too early and it s never too late *Good Housekeeping* ,1927 **The Ladies' Home Journal** ,1922 **Insiders' Guide® to Savannah & Hilton Head** Georgia Byrd,2015-07-17 Insiders Guide to Savannah and Hilton Head is the essential source for in depth travel and relocation information to these treasured Southern cities Written by a local and true insider this guide offers a personal and practical perspective that makes it a must have guide for travelers as well as residents looking to rediscover their home city of Savannah or nearby Hilton Head *Federal Register* ,2013-06 **Results of the 1970 Microwave Oven Survey** LaVert C.
