VENTING REQUIREMENTS

Roof venting

Wall venting

Recommended standard fittings

If the existing vent is round, a rectangular-to-round adapter must be used and a rectangular 3" extension vent between the damper assembly and the adapter must be installed to prevent sticking of the exhaust damper.

For wall or roof venting methods:

If the wall exhaust method is chosen, be sure that there is proper clearance within the wall for the exhaust vent.

Wall and roof caps must have back-draft damper.

We recommend:

- ✓ using rigid metal vent,
- ✓ that length of vent and number of elbows should be kept to a minimum to provide efficient performance,
- ✓ that size of vent should be uniform,
- ✓ using duct tape to seal all joints in the vent system,
- ✓ using caulking compound to seal exterior wall or roof opening around cap,
- ✓ two elbows should not be installed together.

We do NOT recommend:

- ✓ flexible metal vent.

NOTE: If flexible metal vent must be used, calculate each foot of flexible metal vent as two feet of rigid metal vent. Flexible metal elbows count twice as much as standard elbows.

Recommended vent length

Use 3-1/4" x 10" or 6" vent. The total length of the vent system including straight vent, elbows, transitions, wall or roof caps must not exceed the equivalent of 140 feet of 3-1/4" x 10" rectangular or 6" diameter round vent. For best performance, use no more than three 90° elbows. To calculate the length of system you need, add the equivalent feet for each vent piece used in the system. See examples below.

3-1/4" x 10" vent system

6" vent system

Ski, 1995-12 *Translating Cultures* David Katan, 2014-06-03 As the 21st century gets into stride so does the call for a discipline combining culture and translation This second edition of Translating Cultures retains its original aim of putting some rigour and coherence into these fashionable words and lays the foundation for such a discipline This edition has not only been thoroughly revised but it has also been expanded In particular a new chapter has been added which focuses specifically on training translators for translational and intercultural competencies The core of the book provides a model for teaching culture to translators interpreters and other mediators It introduces the reader to current understanding about culture and aims to raise awareness of the fundamental role of culture in constructing perceiving and translating reality Culture is perceived throughout as a system for orienting

experience and a basic presupposition is that the organization of experience is not reality but rather a simplified model and a distortion which varies from culture to culture Each culture acts as a frame within which external signs or reality are interpreted The approach is interdisciplinary taking ideas from contemporary translation theory anthropology Bateson s logical typing and metamessage theories Bandler and Grinder s NLP meta model theory and Hallidayan functional grammar Authentic texts and translations are offered to illustrate the various strategies that a cultural mediator can adopt in order to make the different cultural frames he or she is mediating between more explicit **Ski** ,1995-10 *The Complete Book of Kitchen Design* Ellen Rand,Florence Perchuk,1991 Step by step guide through all the stages of remodeling a kitchen
