The Color of Love Elizabeth Hordge-Freeman,2015-10-30 The Color Of Love reveals the power of racial hierarchies to infiltrate our most intimate relationships Delving far deeper than previous sociologists have into the black Brazilian experience Elizabeth Hordge Freeman examines the relationship between racialization and the emotional life of a family Based on interviews and a sixteen month ethnography of ten working class Brazilian families this provocative work sheds light on how families simultaneously resist and reproduce racial hierarchies Examining race and gender Hordge Freeman illustrates the privileges of whiteness by revealing how those with blacker features often experience material and emotional hardships From parental ties to sibling interactions to extended family and romantic relationships the chapters chart new territory by revealing the connection between proximity to whiteness and the distribution of affection within families Hordge Freeman also explores how black Brazilian families particularly mothers rely on diverse strategies that reproduce negotiate and resist racism She frames efforts to modify racial features as sometimes reflecting internalized racism and at other times as responding to material and emotional considerations Contextualizing their strategies within broader narratives of the African diaspora she examines how Salvador s inhabitants perceive the history of the slave trade itself in a city that is referred to as the blackest in Brazil She argues that racial hierarchies may orchestrate family relationships in ways that reflect and reproduce racial inequality but black Brazilian families actively negotiate these hierarchies to assert their citizenship and humanity

the largest religion in India encompassing roughly 80 percent of the population while 14 percent of the population practices Islam and the remaining 6 percent adheres to other religions The right to freely profess practice and propagate religion in India's constitution is one of the most comprehensive articulations of the right to religious freedom Yet from the late colonial era to the present mass conversions to minority religions have inflamed majority-minority relations in India and complicated the exercise of this right In *Religious Freedom and Mass Conversion in India* Laura Dudley Jenkins examines three mass conversion movements in India among Christians in the 1930s Dalit Buddhists in the 1950s and Mizo Jews in the 2000s Critics of these movements claimed mass converts were victims of overzealous proselytizers promising material benefits but defenders insisted the converts were individuals choosing to convert for spiritual reasons Jenkins traces the origins of these opposing arguments to the 1930s and 1940s when emerging human rights frameworks and early social scientific studies of religion posited an ideal convert an individual making a purely spiritual choice However she observes that India's mass conversions did not adhere to this model and therefore sparked scrutiny of mass converts' individual agency and spiritual sincerity Jenkins demonstrates that the preoccupation with converts' agency and sincerity has resulted in significant challenges to religious freedom One is the proliferation of legislation limiting induced conversions Another is the restriction of affirmative action rights of low-caste people who choose to practice Islam or Christianity Last incendiary rumors are intentionally spread of women being converted to Islam via seduction *Religious Freedom and Mass Conversion in India* illuminates the ways in which these tactics immobilize potential converts reinforce damaging assumptions about women lower castes and religious minorities and continue to restrict religious freedom in India today

Towards Anti-Racist Educational Research Delane A. Bender-Slack,Francis Godwyll,2024-04-08 Towards Anti Racist Educational Research Radical Moments and Movements is a call for educational researchers and teachers to engage in the work needed to be anti

racist In the academy there is no place for neutrality when it comes to race One either endorses the idea of a racial hierarchy or that of racial equality Educators and researchers either believe problems are rooted in groups of people or locate the roots of problems in power and policies Therefore we can either allow racial inequities to continue or confront racial inequities Delane Bender Slack and Francis Godwyll work to confront those racial inequities in educational research As they continue to grapple with their role in radical moments and movements from various identities perspectives and positionalities they strive to identify their intellectual social and cultural labor in their research and in this writing as anti racist The editors define what it could mean to be anti racist in research methods projects and agendas and they pose the following questions How do we ask anti racist research questions How do we create anti racist curricula How do we design anti racist policies What does it mean to be racially humanizing educational researchers How do we intentionally work towards racial justice **Situating**
