Heartless Immensity Anne Baker, 2010-03-25 As the size of the United States more than doubled during the first half of the nineteenth century a powerful current of anxiety ran alongside the well documented optimism about national expansion Heartless Immensity tells the story of how Americans made sense of their country's constantly fluctuating borders and its annexation of vast new territories Anne Baker looks at a variety of sources including letters speeches newspaper editorials schoolbooks as well as visual and literary works of art These cultural

artifacts suggest that the country's anxiety was fueled primarily by two concerns: fears about the size of the nation as a threat to democracy and about the incorporation of nonwhite non-Protestant regions. These fears had a consistent and influential presence until after the Civil War, functioning as vital catalysts for the explosion of literary creativity known as the American Renaissance, including the work of Melville, Thoreau, and Fuller among others. Building on extensive archival research as well as insights from cultural geographers and theorists of nationhood, *Heartless Immensity* demonstrates that national expansion had a far more complicated, multifaceted impact on antebellum American culture than has previously been recognized. Baker shows that Americans developed a variety of linguistic strategies for imagining the form of the United States and its position in relation to other geopolitical entities. Comparisons to European empires, biblical allusions, body politic metaphors, and metaphors derived from science all reflected and often attempted to assuage fears that the nation was becoming either monstrously large or else misshapen in ways that threatened cherished beliefs and national self-images. *Heartless Immensity* argues that in order to understand the nation's shift from republic to empire and to understand American culture in a global context, it is first necessary to pay close attention to the processes by which the physical entity known as the United States came into being. This impressively thorough study will make a valuable contribution to the fields of American studies and literary studies. Anne Baker is Assistant Professor of English at North Carolina State University.

Jay Pather, Performance, and Spatial Politics in South Africa Ketu H. Katrak, 2021-03-02 Jay Pather's *Performance and Spatial Politics in South Africa* offers the first full-length monograph on the award-winning choreographer, theater director, curator, and creative artist in contemporary global performance. Working within the contexts of African studies, dance, theater, and performance, Ketu H. Katrak explores the extent of Pather's productive career but also places him and his work in the South African and global arts scene where he is considered a visionary. Pather, a South African of Indian heritage, is known as a master of space, site, and location. Katrak examines how Pather's performance practices place him in the center of global trends that are interdisciplinary, multidisciplinary, collaborative, and multimedia and that cross borders between dance, theater, visual art, and technology. *Jay Pather, Performance and Spatial Politics in South Africa* offers a vision of an artist who is strategically aware of the spatiality of human life, who understands the human body as the nation's collective history, and who is a symbol of hope and resilience after the trauma of violent segregation.

Sold Down the River Anthony Gene Carey, Historic Chattahoochee Commission, 2011-08-31 Examines a small part of slavery's North American domain: the lower Chattahoochee River Valley between Alabama and Georgia. In the New World, the buying and selling of slaves and of the commodities that they produced generated immense wealth, which reshaped existing societies and helped build new ones. From small beginnings, slavery in North America expanded until it furnished the foundation for two

extraordinarily rich and powerful slave societies the United States of America and then the Confederate States of America The expansion and concentration of slavery into what became the Confederacy in 1861 was arguably the most momentous development after nationhood itself in the early history of the American republic This book examines a relatively small part of slavery's North American domain the lower Chattahoochee river Valley between Alabama and Georgia Although geographically at the heart of Dixie the valley was among the youngest parts of the Old South only thirty seven years separate the founding of Columbus Georgia and the collapse of the Confederacy In those years the area was overrun by a slave society characterized by astonishing demographic territorial and economic expansion Valley counties of Georgia and Alabama became places where everything had its price and where property rights in enslaved persons formed the basis of economic activity Sold Down the River examines a microcosm of slavery as it was experienced in an archetypical southern locale through its effect on individual people as much as can be determined from primary sources Published in cooperation with the Historic Chattahoochee Commission and the Troup County Historical Society

Living Church, 1918 **Seeing Things** Mason Kamana Allred, 2023-02-14 In this theoretically rich work Mason Kamana Allred unearths the ways Mormons have employed a wide range of technologies to translate events beliefs anxieties and hopes into reproducible experiences that contribute to the growth of their religious systems of meaning Drawing on methods from cultural history media studies and religious studies Allred focuses specifically on technologies of vision that have shaped Mormonism as a culture of seeing These technologies he argues were as essential to the making of Mormonism as the humans who received interpreted and practiced their faith While Mormons uses of television and the internet are recent examples of the tradition's use of visual technology Allred excavates older practices and technologies for negotiating the spirit such as panorama displays and magic lantern shows Fusing media theory with feminist new materialism he employs media archaeology to examine Mormons ways of performing distinctions beholding as a way to engender radical visions and standardizing vision to effect assimilation Allred's analysis reveals Mormonism as always materially mediated and argues that religious history is likewise inherently entangled with media
