State Examinations Commission Exam Papers:

Statewide Exit Exams, Governance, and School Development Esther Dominique Klein, 2013 In the context of outcomes based school governance statewide exit exams are often expected to have a positive effect on student achievements if schools and teachers use the performance feedback from the exams for school instructional and professional development. However, very little is known about whether the exams are used for development at all and how this is affected by factors in the exam system and organizational aspects of schools. In a comparison of Finland, Ireland, and the Netherlands, the study therefore investigates how different exam systems and their functions, the conditions at school level, and the use of the exams for school and classroom development are associated. The study uses expert interviews and a questionnaire survey with principals and teachers. The role statewide exit exams can play in education systems is analyzed from a governance perspective and a school development perspective and discussed with an international comparative view. Esther Dominique Klein, born in 1982, Dr. phil., is research assistant at the Faculty of Educational Sciences of the University of Duisburg-Essen. Her main research interests lie in the areas of school system and school development research and international comparative education.

Public Examinations Examined Thomas Kellaghan, Vincent Greaney, 2019-11-19 High stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught, and more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide, of the tensions between examinations and learning, and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as the diploma disease takes hold with an ever greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog. Angela W. Little, Professor

Emerita Institute of Education University College London This book is very well structured and written and draws on the authors remarkable global knowledge across countries and histories It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings Mark Bray UNESCO Chair Professor of Comparative Education University of Hong Kong and former Director UNESCO International Institute for Educational Planning I am sure that *Public Examinations Examined* which thoroughly analyzes the practice of public examinations in different countries and makes profound and well grounded conclusions will arouse very great interest and will serve to further improve public examinations Victor Bolotov Distinguished Professor Higher School of Economics National Research University Moscow member Russian Academy of Education and former Deputy Minister of Education Russian Federation *Annual Report of the New York State Civil Service Commission* New York (State). High-Stakes Testing in Education Theo J.H.M Eggen, Gordon Stobart, 2015-10-14 High stakes educational testing is a global phenomenon which is increasing in both scale and importance Assessments are high stakes when there are serious consequences for one or more stakeholders Historically tests have largely been used for selection or for providing a licence to practise making them high stakes for the test takers Testing is now also used for the purposes of improving standards of teaching and learning and of holding schools accountable for their students results These tests then become high stakes for teachers and schools especially when they have to meet externally imposed targets More recent has been the emergence of international comparative testing which has become high stakes for governments and policy makers as their education systems are judged in relation to the performances of other countries In this book we draw on research which examines each of these uses of high stakes testing The articles evaluate the impact of such assessments and explore the issues of value and fairness which they raise To underline the international appeal of high stakes testing the studies are drawn from Australia Africa the Caribbean Europe former Soviet republics and North America Collectively they illustrate the power of high stakes assessment in shaping for better or for worse policy making and schooling This book was originally published as a special issue of *Assessment in Education Principles Policy Practice*
