Expertise in Every Classroom
Amanda Shuford Mayeaux,Dianne F. Olivier,2020-03-23 Expertise in every classroom should be the norm not the exception We have all had that magical teacher who we remember years later We remember how this teacher made us believe we could do anything The mythical experts exist and have much to teach us in our quest to build a powerhouse education system Unfortunately forty years of research and over 25 years of reform models have led to few changes in the teaching profession

and in the overall outcomes in education Both national and international research demonstrates expertise in teaching can be clearly defined and developed Countries around the world have successfully revamped their systems to develop and support expert teachers While we grapple with failed value added models and are beginning to understand linkage to single achievement test scores leaves out the impact teachers have upon the students peers and the culture as a whole We have erected barriers in the form of scripted curricula overuse of testing and failed professional development models Yet some teachers overcome all the barriers and develop expertise These teachers find avenues of development either in small pockets of peers or individually While other countries are developing experts in mass numbers the United States is creating such teachers in very small pockets Examining the thinking processes and practice of these teachers offers a glimpse into what we should desire in every classroom in every school This book bridges both research and practical elements We believe expert teachers desire both We often discuss the disconnect between research and practice This book is intended to bridge both academic expectations and practitioner expectations We believe the academic community must make research accessible and user friendly to practitioners and practitioners should be at the forefront of research discussions We must blend the ivory towers of academia with the daily work in our schools if we are to create world class systems Expert teachers are both academic researchers and critical practitioners Reform movements are showing little progress We need to redefine the profession

The Re-Imagined

Text Jean I. Marsden, 2014-07-15 Shakespeare's plays were not always the inviolable texts they are almost universally considered to be today. The Restoration and eighteenth century committed what many critics view as one of the most subversive acts in literary history: the rewriting and restructuring of Shakespeare's plays. Many of us are familiar with Nahum Tate's audacious adaptation of *King Lear* with its resoundingly happy ending, but Tate was only one of a score of playwrights who adapted Shakespeare's plays. Between 1660 and 1777 more than fifty adaptations appeared in print and on the stage, works in which playwrights augmented, substantially cut, or completely rewrote the original plays. The plays were staged with new characters, new scenes, new endings, and underlying all this novelty, new words. Why did this happen? And why, in the later eighteenth century, did it stop? These questions have serious implications regarding both the aesthetics of the literary text and its treatment. For the adaptations manifest the period's perceptions of Shakespeare. As such, they demonstrate an important evolution in the definition of poetic language and in the idea of what constitutes a literary work. In *The Re-Imagined Text*, Jean I. Marsden examines both the adaptations and the network of literary theory that surrounds them, thereby exploring the problems of textual sanctity and of the author's relationship to the text. As she demonstrates, Shakespeare's works and English literature in general came to be defined by their words rather than by the plots and morality on which the older aesthetic theory focused. A clear step toward our modern concern for the word and its varying levels of signification.
