

Access Control | PAC 512 Two-Door Controller Series

Overview

The PAC 512 and the PAC 512IP control all aspects of two secure doors, with up to two card readers installed as entry and exit readers on each door. This includes support for a door strike to lock and unlock the door and a door contact to detect the doors position. Each door also has a programmable auxiliary input that may be used for alarm system integration, and an auxiliary output that enables a buzzer or strobe when security is breached or a door is left open. A tamper input enables the monitoring of a enclosure door, and an override input that will release both doors. In the event of communication loss, the PAC 512 allows all local functionality to continue until the server connection is restored.
