Sign of Pathology Nathan Stormer, 2015-06-18 Much of the political polarization that grips the United States is rooted in

the so called culture wars and no topic defines this conflict better than the often contentious and sometimes violent debate over abortion rights In Sign of Pathology Nathan Stormer reframes our understanding of this conflict by examining the medical literature on abortion from the 1800s to the 1960s Often framed as an argument over a right to choose versus a right to life our current understanding of this conflict is as a contest over who has the better position on reproductive biology Against this view Sign of Pathology argues that as it became a medical problem abortion also became a template more generally for struggling with how to live far exceeding discussions of the merits of providing abortions or how to care for patients Abortion practices and all the legal moral and ideological entanglements thereof have rested firmly at the center of debate over many fundamental institutions and concepts namely the individual the family the state human rights and indeed the human Medical rhetoric then was decisive in cultivating abortion as a mode of cultural critique even weaponizing it for discursive conflict on these important subjects although the goal of the medical practice of abortion has never been to establish this kind of struggle Stormer argues that the medical discourse of abortion physicians transformed the state of abortion into an indicator that the culture was ill attacking itself during and through pregnancy in a wrongheaded attempt to cope with reproduction
