The McKenzie Files, Book 3: Obliteration Barry K. Nelson, 2015-01-10 The three reprogrammed Brelac Replids forming the special team Silencers still faithfully serve the United Protectorate under the watchful monitoring of the Central Intelligence Division Stationed on Maseklos Prime Colin McKenzie Diane Christy and Kelly Lytton are called to a hostage scene and end up with clues that lead to the elusive Dr Arthur Trevors Although initially a traitor who worked undercover with the Brelac Trevors was in large part responsible for the capture and reprogramming of Colin Diane and Kelly so they could serve their current function as weapons for the Protectorate The war with the Brelac is not going well and the Silencers are given an advanced warp drive ship and sent beyond their home quadrant Poseidon to the last known coordinates of a missing ship Their mission is to locate the missing ship part of an original task force of five ships sent out to find other human colonies and enlist their help with the war against the Brelac As soon as Colin and his team leave the quadrant they run into trouble and things go downhill from there They find themselves in the midst of a war between local factions on a planet far from home and feel obliged to aid the human faction against a clearly superior force that seems to have help from a monster who leaves a wake of death and destruction wherever it goes The more they find out the weirder things get and they end up stranded with no way home much less any hope of completing their original mission to find the lost task force ship This new enemy they face seems invincible and they wonder if they ll survive as everything and everyone around them is destroyed Maybe this time not even their Replid powers will save them But what other hope does humanity have

A Chronology and Calendar of Documents Relating to the London Book Trade 1641-1700 Donald Francis McKenzie, Maureen Bell, 2005-12-15 The Chronology and Calendar of Documents relating to the London Book Trade 1641 1700 presents abstracts of documents relating to the book trade and book production between 1641 and 1700 It brings together in one sequence edited abstracts of entries referring to named books printers and booksellers selected from the

manuscripts of the Stationers Company Court Books all references to printing publishing bookselling and the book trade occurring in major historical printed sources Calendar of State Papers Domestic the Journals of the Houses of Lords and Commons Reports of the Royal Commission on Historical Manuscripts and entries for contemporary pamphlets The labour records of the printing and bookselling trades probably represent the fullest account of any work force in early modern England and the printed products of the trade survive in such great numbers that they enable us to examine them for evidence not only of who made and sold them but also of how they were made These volumes constitute a reference work of importance not only for literature specialists bibliographers and historians of book production but also for economic social and political historians Not only do they bring together records from a variety of separate printed sources thereby making explicit their interconnections but also they make accessible some less well known manuscript sources notably from the Stationers Company archives Most importantly the Chronology and Calendar extends the earlier work of Arber Greg and Jackson on the earlier seventeenth century As a chronological sequence the volumes meet the need for a preliminary narrative history of the trade in the later seventeenth century and the provision of title name and topic indexes renders this an indispensable reference tool for research into the social political and economic contexts of the book trade its personnel and its printed output

evidential issues while the second part of the book consists of ten short chapters a hit parade in which eminent scholars take a genre or a single exemplar play romance sermon or almanac among other categories as a means to articulate more general issues Throughout the aim is to unpack and interrogate assumptions about the popular and to decentre canonical narratives about for example the sermons of Donne or Andrewes over Smith or the plays of Shakespeare over Mucedorus Revisiting Elizabethan literary culture through the lenses of popularity this collection allows us to view the subject from an unfamiliar angle in which almanacs are more popular than sonnets and proclamations more numerous than plays and in which authors familiar to us are displaced by names now often forgotten
